GESIS-Variable Reports No. 2017/08

ISSP 2009 **–** Social Inequality IV

Variable Report

Documentation release 2017/05/23

Related to the international dataset
Archive-Study-No. ZA5400 Version 4.0.0, doi: 10.4232/1.12777

GESIS **–** Data Archive for the Social Sciences

Principal investigator/authoring entity:

National Program Directors of the participating countries

Responsible for ISSP data integration in the GESIS Data Archive for the Social Sciences:

Irene Müller
Petra Brien

Responsible for the preparation of this variable report:

Petra Brien
Kerstin Beck

Introduction and preliminary remarks

The GESIS Variable Report Series on the International Social Survey Programme Studies offers a comprehensive description of data on study and variable level. For each annual module as well as for the cumulated data sets individual Variable Reports are provided.

The reports are structured into six chapters:
Chapter one gives a brief overview of the worldwide ISSP project as a whole.
Chapter two provides the description of the respective ISSP study including bibliographic information, abstract and methodological specifications.
Chapter three contains information on study related survey materials which are absolutely essential to understand the data properly, followed by general information about the structure of ISSP data sets, documentation standards and variable coding frames in chapter four.
Chapter five provides a short explanation of the variable documentation itself.
Chapter six contains the core variable documentation: the documentation of each variable including complete question texts with all answer categories of the Basic Questionnaire enriched with archival remarks. In addition, this Variable Report presents cross tabulations over countries for all substantial and most of the demographic variables. Archive, protocol and country specific variables are usually shown by frequency distributions. All cross tabulations, descriptive statistics and frequency distributions are based on unweighted data.

The appendix usually contains two sorts of survey materials: the Study Descriptions and, if available, the Characteristics of National Population, basic statistics for all the participating countries of the corresponding module. The data for the annual ISSP modules are collected by independent institutions in each country. The country data is integrated into one international data file, which is documented, distributed and long-term archived by the ISSP Archive, institutionally, the GESIS Data Archive for the Social Sciences (Leibniz Institute for the Social Sciences) in Cologne, Germany (http://www.gesis.org). In every second year from 1997 on, data and documentation have predominantly been prepared by our partners at JDS/ ASEP in Spain (http://www.jdsurvey.com).

Data access

Data for statistical analysis along with information about this data such as version history and errata are made available by the Data Catalogue (https://dbk.gesis.org/dbksearch/).
The Data Online Platform ZACAT of GESIS (http://zacat.gesis.org) provides data documentations and additionally enables users to analyse data online.
Access to the Data Catalogue and ZACAT is free of charge, download of data sets requires registration.

Anonymised data

According to data regulations in participating countries, only anonymised data are made available. Each national team is responsible for carefully checking the data in this respect before the deposit.

Usage requirements

To provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about related research activities, all users of ISSP data are requested to send bibliographic citations for each completed manuscript or thesis abstracts to isspservice@gesis.org or if possible, please directly send a copy of the publication to GESIS (GESIS-Leibniz-Institute for the Social Sciences, Dept. Data Archive - ISSP, Unter Sachsenhausen 6-8, D-50667 Cologne, Germany). Please also observe the general notes on the usage regulations of GESIS Data Archive.

Disclaimer

Neither the original collector of the data, nor GESIS or JDS/ ASEP bears any responsibility for the use of ISSP data or any data analyses.

Citation of this Variable Report

Please, use the following citation for this Variable Report:

GESIS, ed. 2017. ISSP 2009 – Social Inequality IV, Variable Report: Documentation release 2017/05/23, related to the international dataset Archive-Study-No. ZA5400 Version 4.0.0, Variable Reports 2017|07. Cologne: GESIS.

Request

Please, alert us to any errors or problems that you might notice in the data or the documentation. All comments and remarks are very much appreciated to enhance the quality of the data: isspservice@gesis.org

1 ISSP Series Description

1.1 Series name

The International Social Survey Programme (ISSP)

1.2 Series information

The ISSP is a cross-national collaboration programme, which has been continuously conducting annual surveys on diverse social science topics since 1985. The topics for each ISSP survey are proposed by delegates from ISSP member countries. Then, a Basic Questionnaire is composed and improved over several years by a committee, elected by the General Assembly before it is pretested in various countries. Starting in 1984 with four founding nations - Australia, Germany, Great Britain and the United States, the ISSP meanwhile has grown up to almost 50 member countries covering various cultures around the globe.

ISSP Modules 1985 – 2020:

- Citizenship: 2004/ 2014
- Environment: 1993/ 2000/ 2010/ 2020
- Family and Changing Gender Roles: 1988/ 1994/ 2002/ 2012
- Health and Health Care: 2011
- Leisure Time and Sports: 2007
- National Identity: 1995/ 2003/ 2013
- Religion: 1991/ 1998/ 2008/ 2018
- Role of Government: 1985/ 1990/ 1996/ 2006/ 2016
- Social Inequality: 1987/ 1992/ 1999/ 2009/ 2019
- Social Networks: 1986/ 2001/ 2017
- Work Orientations: 1989/ 1997/ 2005/ 2015

All ISSP members agree
1. to jointly develop modules addressing important areas of social science,
2. to field the modules either as an individual survey or as supplements to the regular national surveys and
3. to make the data available to the social science community as quickly as possible.

As the surveys are designed for replication they offer both cross-national and cross-time comparison, creating the base for a vast range of substantive and methodological research. Since there is no external fund agency, ISSP members fund their own surveys. Beyond that, ISSP committee members fund ISSP central coordination, networking, development of source questionnaires, or methodological work.

For more information on the ISSP in general, its working principles, contact addresses of ISSP members and principal investigators, please visit the ISSP web site (http://www.issp.org).

2 Study Description – International Social Survey Programme 2009

2.1 Bibliographic information

2.1.1 Archive study number

GESIS: ZA5400

2.1.2 Title

International Social Survey Programme 2009: Social Inequality IV – ISSP 2009

2.1.3 Authoring Entity/ Principal Investigators

Name	Affiliation
Jorrat, Jorge R.	CEDOP-UBA, Argentina
Evans, Ann	The Australian National University, Canberra, Australia
Haller, Max	Institut für Soziologie, Karl-Franzens-Universität Graz, Austria
Hadler, Markus	Institut für Soziologie, Karl-Franzens-Universität Graz, Austria
	Agency for Social Analyses (ASA), Bulgaria
Segovia, Carolina	Centro de Estudios Públicos (CEP), Santiago, Chile
Bian, Yanjie	University of Minnesota, Minnesota, USA
Li, Lulu	Renmin University of China, Beijing, China
	Institute for Social Research, Zagreb, Croatia
Papageorgiou, Bambos	Center of Applied Research, Cyprus College, Nicosia, Cyprus
Simonová, Natalie	Institute of Sociology, Academy of Sciences of the Czech Republic, Praha, Czech Republic

2.1.4 Bibliographic citation

Publications based on ISSP data, which are made available through GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations should appear in footnotes or in the reference section of publications.

How to cite the data: ISSP Research Group (2017): International Social Survey Programme: Social Inequality IV – ISSP 2009. GESIS Data Archive, Cologne. ZA5400 Data file Version 4.0.0, doi: 10.4232/1.12777

2.2 Content

2.2.1 Abstract

Social Inequality.

2.2.2 Topic classification

Themes: Importance of social background, merit, discrimination, corruption and good relations as prerequisites for success in society (wealthy family, well-educated parents, good education, ambitions, hard working, knowing the right people, political connections, giving bribes, person´s race and religion, gender); attitude towards equality of educational opportunity in one´s country (corruption as criteria for social mobility, only students from the best secondary schools have a good chance to obtain a university education, only rich people can afford the costs of attending university, same chances for everyone to enter university, regardless of gender, ethnicity or social background); opinion about own salary: actual occupational earning is adequate; estimation of actual and reasonable earnings for occupational groups: doctor, chairman of a large national corporation, shop assistant, unskilled worker in a factory, cabinet minister in the national government; income differences are too large in the respondent´s country; responsibility of government to reduce income differences; government should provide a decent standard of living for the unemployed and spend less on benefits for poor people; demand for higher taxes for people with high incomes; opinion on taxes for people with high income; justification of better medical supply and better education for people with higher income; perception of class conflicts between social groups in the country (poor and rich people, working class and middle class, management and workers, people at the top of society and people at the bottom); self-assessment and assessment of the family the respondent grew up in on a top-bottom-scale; social position compared to father (social mobility); salary criteria (scale: responsibility, education, needed support for family and children, quality of job performance or hard work at the job); feeling of a just payment; characterisation of the actual and the desired social system of the country, measured by classification on pyramid diagrams (image of society).

Demography: sex; age; marital status; steady life partner; years of schooling; highest education level; country specific education and degree; current employment status (respondent and partner); hours worked weekly; occupation (ISCO 1988) (respondent and partner); supervising function at work; working for private or public sector or self-employed (respondent and partner); if self-employed: number of employees; trade union membership; earnings of respondent (country specific); family income (country specific); size of household; household composition; party affiliation (left-right); country specific party affiliation; participation in last election; religious denomination; religious main groups; attendance of religious services; self-placement on a top-bottom scale; region (country specific); size of community (country specific); type of community: urban-rural area; country of origin or ethnic group affiliation; occupation status and profession of respondent´s father and mother during the youth of the respondent (ISCO 88); number of books in the parental home during the youth of the respondent (cultural resources); occupational status and profession in the first job and the current job (ISCO 88 and working type); self-assessment of the social class; estimated amount of family wealth (monetary value of assets); work orientation: self-characterisation at this time and in the youth of the respondent

concerning his performance at work respectively at school.

Additionally coded: administrative mode of data-collection; case substitution; weighting factor.

2.3 Geographical Coverage

Argentina (AR), Austria (AT), Australia (AU), Belgium/Flanders (BE-FLA), Bulgaria (BG), Switzerland (CH), Chile (CL), China (CN), Cyprus (CY), Czech Republic (CZ), Germany (DE), Denmark (DK), Estonia (EE), Spain (ES), Finland (FI), France (FR), Great Britain (GB-GBN), Croatia (HR), Hungary (HU), Israel (IL), Iceland (IS), Italy (IT), Japan (JP), South Korea (KR), Lithuania (LT), Latvia (LV), Norway (NO), New Zealand (NZ), Philippines (PH), Poland (PL), Portugal (PT), Russian Federation (RU), Sweden (SE), Slovenia (SI), Slovakia (SK), Turkey (TR), Taiwan (TW), Ukraine (UA), United States (US), Venezuela (VE), South Africa (ZA)

2.4 Universe

Persons aged 18 and older (Finland: 15-74; Italy, Japan: 16 and older; Norway: 19-80; Sweden: 17-79)

2.5 Sampling procedure

Sampling procedures differ for the individual countries: partly simple, partly multi-stage stratified random samples.

2.6 Fieldwork and sample sizes

Table: Participating countries (regions) and fieldwork information for ISSP 2009

Country (Region)	ISO	Fieldwork start/ end	Fieldwork Institute	Questionnaire-versions	Sample Size (n of cases)
Argentina	AR	08 Jul 10 – 01 Nov 10	Cualitativo y Cuantitativo	AR09	1133

2.7 Mode of data collection

Mode of interview differs for the individual countries: partly face-to-face interviews (partly CAPI) with standardized questionnaire, partly paper and pencil and postal survey.

3 Corresponding survey material

When dealing with international comparative data, data sets and documentation must be seen as two sides of the same coin. Even though ISSP members make huge efforts to produce comparable data in each country, there still remains a remarkable amount of country specific peculiarities in the contributions to the final, international data set. These country specific peculiarities either have to be harmonised or to be documented, as they provide vital information for secondary analysts. Therefore, a set of procedures has been developed to take care for orderly technical preparation of national data sets and to allow for the systematic collection of required context information.

All corresponding survey materials are provided in English, only the national questionnaires are available in the national language(s) of each country.

3.1 Basic Questionnaire

The ISSP General Assembly concludes the design phase of an ISSP module after intensive discussions on the single items of the Basic Questionnaire roughly a year before the module is fielded. Two third of the module questions have to be replications from previous ISSP modules of the same subject. According to this, one third of the questions in each module are new. Subsequent to the mandatory module questions, some pre-selected optional questions can be added. Finally, ISSP member countries translate the British English Basic Questionnaire to their local language as equivalent as possible.

Drafting group for the Basic Questionnaire on the Social Inequality Module 2009:

- Australia
- Czech Republic
- Hungary
- Netherlands, convenor: Harry Ganzeboom, Saskia Opdam, Heike Schröder
- Taiwan
- United States of America

3.2 Background Variables Standards and Documentation

Apart from the Basic Questionnaire, covering the substantial module variables, countries also have to collect responses on a defined set of ISSP Standard Background Variables, which predominantly contains demographic information. Since the ISSP often runs with larger national surveys, the background variables are mainly taken from these surveys. Thus, demographic issues cannot be asked in a fixed form over all members of the ISSP. They have to meet the demands of the national studies first. As a result, the demographic variables for the ISSP need to be post-harmonised according to a developed set of common standards.

Over the past 30 years, there have been different Background Variable Standards:
The first set of background variables was established in 1985 with the first ISSP survey. Here countries agreed on collecting the same demographic information. This list of variables underwent a revision in 2001, now providing a coding frame for each background variable. It was valid until 2009.
In 2010 a new revision process of the ISSP Background Variables, planned for a three years period, started. Beginning with the ISSP module 2010, this first revised version of the ISSP Background Variable Standard concentrating mainly on variables containing work, occupational and partnership status information came into effect. The second round of revisions, coming into effect in 2011, had its focus on the education variables, while the last change is going to be made on the variable measuring ethnicity, effective with the module 2013. The new standard is documented in some guidelines (different documents indicating the intermediate steps of revision), providing detailed information and instructions on the variables measurement goals, coding frames, filters and possible question texts. Additionally, the question texts are summarised in a Master Questionnaire on

Background Variables.

Since 2004 countries document the post-harmonisation processes for each variable in a special documentation template provided by the Archive. This template, always adjusted to the current standard, offers detailed country specific information on administration, derivation, and coding of the ISSP Background Variables.
All relevant background variable documents are available from the ISSP webpages at GESIS.

3.3 National Study Description

For each country, the original National Study Description is available in the appendix of this Variable Report. The National Study Descriptions are provided by the countries and include information on sample sizes, field dates, modes of data collection, sampling procedures, response rates and weighting processes.

3.4 Characteristics of National Population

The appendix of this Variable Report also includes Characteristics of National Populations for all participating countries from 1989 on. These documents provide statistical data on the composition of national populations in terms of gender, age, education and employment rates and, therefore, allow assessing how representative national samples are.

3.5 Where to find the survey materials and the data set of the ISSP Module of 2009 – Social Inequality IV

In the GESIS Data Catalogue on the GESIS web you find

- the Basic Questionnaire of this module together with
- all country questionnaires in the respective local languages,
- this Codebook (Variable Report) with the National Study Descriptions and the Characteristics of National Populations in its appendix
- detailed National Documentations on phrasing and coding of the Background Variables,
- the Study Monitoring Report and
- the integrated data file ZA5400_v4.0.0 for download

under the tab "Data and Documents" of: https://dbk.gesis.org/dbksearch/SDESC2.asp?no=5400

Information on fixed errors and resolved problems for this and also former data set versions can be found under the tab "Errata & Versions".

K. M. Slomczynski, P. Powalko and T. Krauze address the problem of non-unique records in international survey projects, among them the ISSP module of 2009. ZA5400_v3-0-0 and prior dataset versions for ISSP 2009 contain duplicate records for Norway and Venezuela. In Norway this is due to errors in the final, technical processing of the data file at the fieldwork agency. However, all duplicate records have been deleted since dataset version ZA5400_v4-0-0. As a consequence the sample size has decreased, for Norway from 1.456 to 1.246 and for Venezuela from 999 to 969 respondents.

The GESIS online data portal ZACAT provides the documentation of this integrated data file and also further study-related materials for download:

http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fStudy/ZA5400

Beyond this, ZACAT enables users to perform basic online analyses like frequency distributions, cross tabulations or regressions.

4 Data set structure and standards

ISSP data sets are processed and documented by the Data Archive of GESIS and by ASEP/ JDS every second year in accordance with agreed standards, which may differ in some details. Despite several changes in the background variables, a certain standard has been established in the course of time.

In order to uniquely identify a data set, to each data set version a GESIS Study No., a Version No., and a Digital Object Identifier (DOI) is assigned. The DOI is linked to the Study Description in the Data Catalogue (https://dbk.gesis.org/dbksearch/index.asp). Metadata filled in the Study Description of ISSP 2009 data and associated with a DOI are provided to the registration agency for social science data (da|ra).

The DOI: 10.4232/1.12777 is assigned to the ISSP 2009 (v4.0.0).

4.1 Data set structure

Usually, the ISSP data sets are structured as follows:

1. Archive and Identification Variables

    Administrative variables are used for identifying data sets, respondents and countries (GESIS Data Archive Study Number, Version Number, DOI, Respondent Number, Country Codes).
    The GESIS Archive version variable includes the number of the data set and the respective release date, composed as a string variable with three numbers:

    - The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
    - The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
    -The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

    Country codes identify each case as belonging to one country. The country code variable, which was used according to a scheme leaning on international automobile identification codes in the beginning of the ISSP, was replaced by three country code variables based on the ISO Code 3166. Two of the country code variables are numerically coded, one identifies countries as a whole, the other one possible subsamples, such as East and West Germany. The cross tabulations shown in this Variable Report are based on a third, alphanumerical country code variable.

2. Substantial Variables

    The substantial variables contain the mandatory module questions, often supplemented by optional questions.

    Variable labels provide keywords based on the question text; these keywords are applied consistently if questions or question items are repeated over time. All substantial variables include the original question number of the Basic Questionnaire in the variable labels.
    Generally, all module variable names consist of the standard prefix 'V' and the consecutive variable number (up to ISSP 2014 beginning with the archive variables).

3. ISSP Background Variables

    In the earlier ISSP modules, all variables are numbered consecutively, beginning with the archive variables and followed by substantial and background variables. The last variable of each data set

usually is the variable on weighting. Later on, the background variables start with V200 et seq.. Nowadays, these variable numbers are expressed by mnemonics with max. 8 characters (SEX, AGE, ...).

4.   Country Specific Variables

Variables, which cannot be harmonised for various reasons, are usually presented as country specific variables. As a rule, variable names of country specific variables have country abbreviations as prefixes. In some of the older ISSP studies, the principle of country specific variables is not used. Instead all country specific information is integrated into one variable.

5.   Protocol Variables

There are five protocol variables in the latest ISSP modules. The variable 'MODE' indicates the mode of data collection, while 'SUBSCASE' indicates whether a respondent in the sample is an original case or a replacement for an originally selected respondent who was not available. The variables 'DATEYR', 'DATEMO' and 'DATEDY' provide information on the dates and periods of fielding.
ISSP surveys prior to 2010 do not include the three DATE variables for indicating the fielding date and ISSP surveys before 2007 do not contain the SUBSCASE variable.

6.   Weight

There is no weight available for the international comparison on the ISSP across countries.
Please note that also country subsamples can be over- respectively underrepresented without any weighting factor correcting for the imbalance. This fact has to be taken into account if these countries in question are analysed as one unit.

4.1.1 Deviating data set structure in ZA5400

Within the bloc of optional variables there are three additional variables for Turkey due to the fact that in the optional question on personality traits a 5-point scale was used instead of a 4-point scale (Q24a-c). The Turkish questionnaire additionally included the middle answer category "Neither agree nor disagree". Data thus obtained are not comparable to the rest of the countries.

4.2 Data preparation

On the basis of the Basic Questionnaire covering the substantial variables and the standard core set of background variables the Archive provides a Standard Setup for each individual ISSP module, which defines the variable and value labels for the integrated data file. All country data sets should be processed and prepared to match the structure of the Standard Setup before the material is deposited to the GESIS Data Archive for integration and archiving.

After conducting the national surveys, all collaborators are supposed to deposit their data at the GESIS Data Archive, where all the deposited data sets are prepared, integrated and merged into one single international data set, which is finally published.

During the data preparation process all national data sets are successively controlled for completeness, missing data and duplicate records, for wild codes and for formal consistency of response patterns and question routing. Moreover, national derivation processes from source to target codes in the background variables are controlled. Missing values, especially due to filter instructions are checked and recoded where necessary. Errors, which are discovered during these procedures, are corrected or documented in cooperation with primary investigators.

However, not all inconsistencies are errors. Some inconsistencies might be owed to irrational response behavior or may be a consequence of different modes of data-collection in or across the participating countries during the fieldwork phase. Such inconsistencies are not eliminated during the data preparation process.

Complete machine-readable DDI-XML (see chapter 4.5) compliant documentation is created for all ISSP data sets by GESIS.

4.3 Coding frames

By general rule, the variables of the module questions adopt the coding frame as specified in the Basic Questionnaire, except for multiple response questions.

GESIS adds 'Not applicable' (NAP) codes for questions that have filters. NAP indicates that only a subsample and not all of the respondents were asked. Also in the case of country specific variables, all the other countries are coded NAP.

GESIS adds 'Not available' (NAV) for variables which in single countries may not have been conducted for whatever reason.

4.3.1 Country specific answer categories

ISSP data include some questions (variables) which have country specific answer categories such as DEGREE, RESPONDENT'S INCOME, FAMILY INCOME, PARTY AFFILIATION (PARTY VOTED LAST ELECTION), REGION and SIZE OF COMMUNITY (until ISSP 2009).
For country specific income variables with answer categories, the data is recoded to midpoints of the categories.

For occupation, official international occupation codes are used. While in the first years of the ISSP many countries used country specific occupation codes, ISCO 1988 has been established as a standard over the years. Starting with ISSP 2014, ISCO 2008 is used.

Recently additionally provided as country specific variables: RELIGION (since ISSP 2010), ETHNIC GROUP (since ISSP 2013)

4.3.2 Missing values

In general, the missing values are standardised across ISSP modules. For all variables a set of missing values is defined:

0: Not applicable (NAP), Not available (NAV)
7 (97, 997, 9997, ...): Refused
8 (98,998, 9998, ...): Don't know
9 (99, 999,9999, ...): No answer

4.4 Weighting

Please note, that there is no total weight usable for international comparison. While all ISSP data sets contain a weighting variable, the weights in this variable do not incorporate a common weighting scheme that can be applied to all countries of the same ISSP module.

In the Study Description and/ or in the Background Variables Documentation of each country you will find more detailed information on the kind of weights that are used. You can see, whether

- a design weight
- weights to adjust for non-response bias or
- a combination of these both weights above or
- different weighting procedures

are applied. However, some countries dispense with weighting factors. If no weight is provided, the variable **"Weight" is coded to 1.0. O**therwise the weighting factor is unequal 1.0 (but greater than 0).

It may be advisable to weight data to increase representativeness in certain cases. For ISSP data we strongly recommend consulting the National Study Descriptions for information on the certain weighting factor composition and maybe even the Characteristics of National Population for more context information. An initial overview of the national weighting procedures is provided in this Variable Report in chapter 6.

4.5 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social sciences, established by the Data Documentation Initiative <DDI>. The Variable Reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the Basic Questionnaire with the variable description (variable name, values, and labels) of the data set. General remarks and comments referring to a certain variable are defined as variable notes. Notes mostly include additional information on country specific deviations from the ISSP standard, information about data problems or other specific characteristics.

5 Explanation of the variable documentation

The variable documentation part of this Variable Report describes each variable in the data file including all relevant information for this variable such as the single question components or further notes and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable 'C_ALPHAN'. ISO 3166-2 is applied for the UK's subsample Great Britain (GB-GBN). No ISO standard code is available for the subsample Flanders of Belgium; it is labeled 'BE-FLA'.

AR	Argentina	IT	Italy

IS	Iceland		

The example explained below shows the information that for a typical substantial variable appears in the variable documentation part of a Variable Report. Results are usually broken down by country or presented as frequency counts in the case of country specific variables. In the case of variables with long lists of coded values (e.g. ISCO/ SPISCO) results are not shown or, if appropriate, reflected by descriptive indicators such as mean or median (e.g. AGE, country specific variables RINC and INC). The descriptive parameters mean and/ or median are sometimes also presented despite the fact that an open answer scale was used (e.g. WRKHRS code 96 '96 hours or more') to give an idea of the distribution of this variable across countries.

The complete question and answer texts are taken from the final Basic Questionnaire as provided. All deviations are documented in this Variable Report.

As there is neither an international weighting factor nor a national weighting factor which would be comparable for all participating countries, all frequencies and tables are calculated from unweighted data.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the data set.

QUESTION NUMBER and full QUESTION TEXT from the Basic Questionnaire, including interviewer instructions, if applicable. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the Basic Questionnaire. Abbreviations commonly used in the code definitions are DK (don't know), NA (no answer), NAP (not applicable) and NAV (not available).

DERIVATION information refers to the construction principle of derived variables.
NOTE delineates additional explanatory text or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies base on unweighted data. The relative frequencies (row percent) refer to the valid cases (n valid sum), i.e. the total number of cases (n sum) reduced by the number of cases defined as missing data (M).

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on basis of the valid cases.

DESCRIPTIVE PARAMETERS: For some interval-scaled variables descriptive parameters such as minimum, maximum, and (if appropriate) median and mean are given on the basis of the valid cases.

(see next page)

Variable, Label
Question Text (Original Language)

V1 - ZA Study number

GESIS Data Archive Study Number ZA5400 for the ISSP 2009 on 'Social Inequality IV'.

Study number of the data set producer and archiving number

5400   GESIS Data Archive Study Number ZA5400

V1

Value	Label	Missing	Count	Percent	Valid Percent
5400	GESIS Data Archive Study Number ZA5400		56021	100.0	100.0
	Sum		56021	100.0	100.0
	Valid Cases		56021		

V2 - GESIS Archive Version

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as a string.

The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

V2

Value	Label	Missing	Count	Percent	Valid Percent
4.0.0 (2017-05-23)			56021	100.0	100.0
	Sum		56021	100.0	100.0
	Valid Cases		56021		

DOI - Digital Object Identifier

Digital Object Identifier (DOI)

This variable holds the Digital Object Identifier (DOI) for the data set at hand as registered via the DA|RA registration agency for economic and social science data. Each data set version (see variable V2) has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new data set versions, the DOI needs to be appended to the resolver service URL:

http://dx.doi.org/10.4232/1.12777

In terms of good scientific practice, the DOI is an important element for the correct citation of a data set.

DOI

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.12777			56021	100.0	100.0
	Sum		56021	100.0	100.0
	Valid Cases		56021		

V3 - Respondent Number

Respondent Identification Number

This variable contains the original identification numbers of the respondents. The ID number is only unique within its respective country's sample (V4)/ country (V5). To provide a unique identification across the full integrated file, it is necessary to combine V3 and V4/ V5.

V4 - Country/Sample (see V5 for codes for whole nation states)

Country/Sample (see V5 for codes for whole nation states).

To indicate the subsamples within the ISSP countries a code on the basis of ISO 3166 was constructed. For all countries without subsamples the three digit ISO 3166 Code (as in V5) was used.

For those with subsamples a five digit numeric code is used. The first three-digits are based on the original ISO code (see V5) and indicate the country. The following two-digit numeric appendices (01, 02) indicate the subsamples.

No ISO standard codes are available for the "historical" East/ West subdivision of Germany (DE-E/ DE-W) and for the subsamples of Belgium (only Flanders included) as in the Flemish sample primarily residents from Flanders but in addition to them also residents from Brussels were interviewed via selection on Dutch addresses. ISO 3166-2 is applied for the subsample of the United Kingdom, only Great Britain is included.

C_ALPHAN - Country/Sample Prefix ISO 3166 Code - alphanumeric

ISO 3166 Country/ Sample Prefix ISO 3166 Code - alphanumeric

This alphanumerical country identification variable C_ALPHAN includes ISO 3166-1-alpha-2 country codes, if available. ISO 3166-2 is applied for the UK's subsample Great Britain (GB-GBN). No ISO standard code is available for the subsample Flanders of Belgium; it is labeled "BE-FLA". Concerning Israel, the variable IL_REG can be used as a flag variable to distinguish between the Jewish and Arabic population.

This variable is used for the cross tabulations shown in the Variable Report.

AR = Argentina

AT = Austria

AU = Australia

BE-FLA = Belgium/ Flanders

BG = Bulgaria

CH = Switzerland

CL = Chile

V6 - Q1a Getting ahead: How important is coming from a wealthy family?

Q1

To begin we have some questions about opportunities for getting ahead. Please tick one box for each of these to show how important you

think it is for getting ahead in life.

(Please tick one box on each line.)

Q1a How important is coming from a wealthy family?

1   Essential
2   Very important
3   Fairly important
4   Not very important
5   Not important at all
8   Can't choose
9   No answer

V11 - Q1f Getting ahead: How important is knowing the right people?

Q1

To begin we have some questions about opportunities for getting ahead. Please tick one box for each of these to show how important you

think it is for getting ahead in life.

(Please tick one box on each line.)

Q1f How important is knowing the right people?

1 Essential
2 Very important
3 Fairly important
4 Not very important
5 Not important at all
8 Can't choose
9 No answer

V14 - Q1i Getting ahead: How important is a person's race?

Q1

To begin we have some questions about opportunities for getting ahead. Please tick one box for each of these to show how important you think it is for getting ahead in life.

(Please tick one box on each line.)

Q1i How important is a person's race?

1 Essential
2 Very important
3 Fairly important
4 Not very important
5 Not important at all
8 Can't choose
9 No answer

V16 - Q1k Getting ahead: How important is being born a man or a woman?

Q1

To begin we have some questions about opportunities for getting ahead. Please tick one box for each of these to show how important you think it is for getting ahead in life.

(Please tick one box on each line.)

Q1k How important is being born a man or a woman?

1 Essential

2 Very important

3 Fairly important

4 Not very important

5 Not important at all

8 Can't choose

9 No answer

V22 - Q4a Actually earn: About how much do you think a doctor in general practice earns?

Q4

We would like to know what you think people in these jobs actually earn. Please write in how much you think they usually earn each <YEAR/ MONTH/ FORTNIGHT/ WEEK>, <BEFORE/ AFTER> taxes. Many people are not exactly sure about this, but your best guess will be close enough. This may be difficult, but it is very important. So please try.

(Please write in how much they ACTUALLY earn each <year/ month/ fortnight/ week> <before/ after> taxes. Coding instructions: If answered with a range, take best estimate midpoint. If answered DK, take -98. If not answered, code -99. If multiple answers, take first)

Q4a Actually earn: About how much do you think a doctor in general practice earns?

-99   No answer
-98   Don't know
-97   Refused

in Taiwan (TW):
99999995   99999995 or more

Note:

In Q4 and Q5 (V22-V31) income is asked according to the original questionnaires as follows:

AR: Monthly income after taxes in ARS.
AT: Monthly income before taxes in EUR.
AU: Yearly income before taxes in AUD.
BE-FLA: Monthly income after taxes in EUR.
BG: Monthly income before taxes in BGN.
CH: Monthly income after taxes in CHF.
CL: Monthly income after taxes in CLP.
CN: Yearly income before taxes in CNY.
CY: Monthly income before taxes in EUR.
CZ: Monthly income before taxes in CZK.
DE: Monthly income before taxes in EUR.
DK: Yearly income before taxes in DKK.
EE: Monthly income after taxes in EEK.
ES: Monthly income after taxes in EUR.
FI: Monthly income before taxes in EUR.
FR: Monthly income after taxes in EUR.

V44 - Q10a [TOPBOT] Groups tending towards top+bottom. Where would you put yourself on this scale?

Q10a

In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from top to bottom. Where would you put yourself now on this scale?

(Please tick one box.)

<For Q10ab, use either numbered or unnumbered boxes, or numbers, to label the answer categories;

Note that the answer categories of this question MUST be laid out vertically with 10 at the top and 1 at the bottom.>

<This variable is a standard background variable and should replace the standard background variable TOPBOT.>

V45 - Q10b Where did the family that you grew up in, fit in then?

[Q10a

In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. ...]

Q10b

And if you think about the family that you grew up in, where did they fit in then?

(Please tick one box.)

<For Q10ab, use either numbered or unnumbered boxes, or numbers, to label the answer categories;

Note that the answer categories of this question MUST be laid out vertically with 10 at the top and 1 at the bottom>

V46 - Q11 Level of status of Rs job compared to the job of father

Q11

Please think about your present job (or your last one if you don't have one now). If you compare this job to the job your father had when you were <14,15,16>, would you say that the level of status of your job is (or was).

(Please tick one box.)

1   Much higher than your fathers

2   Higher

3   About equal

4   Lower

5   Much lower than your fathers

6   I never had a job

7   I dont know what my father did, father never had a job, never knew father

8   Don't know

9   No answer

V51 - Q12e Important for pay: how well he or she does the job?

Q12

In deciding how much people ought to earn, how important should each of these things be, in your opinion.

(Please tick one box on each line)

Q12e How well he or she does the job - how important should that be in deciding pay?

1   Essential

2   Very important

3   Fairly important

4   Not very important

5   Not important at all

8   Can't choose

9   No answer

V52 by C_ALPHAN, Absolute Values (Row Percent)

V53 - Q13 Is your pay just?

Q13

Is your pay just? We are not asking about how much you would like to earn - but what you feel is just given your skills and effort. If you are not working now, please tell about your last job.

(Please tick one box.)

1 Much less than is just
2 A little less than is just
3 About just for me
4 A little more than is just
5 Much more than is just
6 Never had a job
8 Can't choose
9 No answer

V54 - Q14a Type of society: What type of society is [Rs country] today - which diagram comes closest?

Q14

These five diagrams show different types of society. Please read the descriptions and look at the diagrams and decide which you think best describes <R's country>.

1: Type A: A small elite at the top, very few people in the middle and the great mass of people at the bottom.

2: Type B: A society like a pyramid with a small elite at the top, more people in the middle and the most at the bottom.

3: Type C: A pyramid except that just a few people are at the bottom.

4: Type D: A society with most people in the middle.

5: Type E: Many people near the top, and only a few near the bottom.

(Please tick one box)

Q14a First, what type of society is <R's country> today - which diagram comes closest?

1 Type A

2 Type B

3 Type C

4 Type D

5 Type E

V56 - Q15a When you were [14-15-16] years old, for whom did your father work?

Q15a

When you were <14-15-16> years old, for whom did your father work? If your father did not have a paid job at this time, please give information about his last job before that time.

(Please tick one box.)

<The background questions can be asked separately from the attitudinal questions. Like other demographic and background variables, the questions can be put wherever you like in the questionnaire they need not be with the other ISSP questions.>

0   NAP: Father deceased or never worked (KR); Did not know father, father never worked, father dead (EE); No father

1   Employee of a private company or business

2   Government (national, state or local government); State-owned enterprise (UA)

V57 - Q15b When you were [14-15-16] years old, what kind of work did your father do?

Q15b

When you were <14-15-16> years old, what kind of work did your father do; what was his main occupation? Describe fully, using two words or more (do not use initials or abbreviations). If your father did not have a paid job at the time, please give information about his last job before that time.

<Answers to the open occupation questions Q15b, Q16c and Q18b must be coded to the International Labour Office's International Standard Classification of Occupations 1988 - the full 4 digit code.>

V60 - Q16c When you were [14-15-16] years old, what kind of work did your mother do?

Q16c

When you were <14-15-16> years old, what kind of work did your mother do; what was her main occupation? Please describe fully, using two words or more (do not use initials or abbreviations). If your mother did not have a paid job at the time, please give information about her last job before that time.

<Answers to the open occupation questions Q15b, Q16c and Q18b must be coded to the International Labour Office's International Standard Classification of Occupations 1988 - the full 4 digit code.>

5111 Travel attendentsand travel stewards

5112 Transport conductors

5113 Travel guides

5120 Housekeeping and restaurant services workers

5121 Housekeepers and related workers

5122 Cooks

5123 Waiters, waitresses and bartenders

5130 Personal care and related workers

5131 Child care workers

5132 Institution-based personal care workers

5133 Home-based personal care workers

5139 Personal care and related workers not elsewhere classified

5140 Other personal services workers

5141 Hairdressers, barbers, beauticians and related workers

5142 Companions and valets

5143 Undertakers and embalmers

5149 Other personal services workers nec

5150 Astrologers, fortune-tellers and related workers

5151 Astrologers and related workers

5152 Fortune-tellers and related workers

5160 Protective services workers

5161 Fire-fighters

5162 Police officers

5163 Prison guards

5169 Protective services workers nec

5200 Models, salespersons and demonstrators

5210 Fashion and other models

5220 Shop salespersons and demonstrators

5230 Stall and market salespersons

6000 Skilled agriculturaland fishery worker

6100 Market-oriented skilled agricultural and fishery workers

6110 Market gardeners and crop growers

6111 Field crop and vegetable growers

6112 Tree and shrub crop growers

6113 Gardeners, horticultural and nursery growers

6114 Mixed-crop growers

6120 Market-oriented animal producers and related workers

6121 Dairy and livestock producers

6122 Poultry producers

6123 Apiarists and sericulturists

6124 Mixed animal producers

6129 Market-oriented animal producers nec

6130 Market-oriented crop animal producer

6132 Farmers

6140 Forestry and related worker

6141 Forestry workers and logger

6142 Charcoal burners and related worker

6150 Fishery workers, hunters and trappers

6151 Aquatic-life cultivation worker

6152 Inland and coastal waters fishery workers

6153 Deep-sea fishery worker

6154 Hunters and trappers

6200 Subsistence agricultural and fishery workers

6210 Subsistence agricultural and fishery workers

7000 Craft and trade workers

7100 Extraction and building trades worker

7110 Miners, shot firers, stone cutters and carvers

7111 Miners and quarry workers

7112 Shotfirers and blasters

7113 Stone splitters, cutters and carvers

7120 Building frame and related trades workers

7121 Builders, traditional materials

7122 Bricklayers and stonemasons

7123 Concrete placers, concrete finishers and related workers

7124 Carpenters and joiners

7129 Building frame and related trades workers not elsewhere classified

7130 Building finishers and related trades workers

7131 Roofers

7132 Floor layers and tile setters

7133 Plasterers

7134 Insulation workers

7135 Glaziers

7136 Plumbers and pipe fitters

7137 Building and related electricians

7140 Painters, building structure cleaners and related trades workers

7141 Painters and related workers

7142 Varnishers and related painters

7143 Building structure cleaners

7200 Metal, machinery and related trades workers

7210 Metal moulders, welders, sheet-metal workers, structural metal preparers and related trades workers

7211 Metal moulders and core makers

7212 Welders and flamecutters

7213 Sheet-metal workers

7214 Structural-metal preparers and erectors

7215 Riggers and cable splicers

7216 Underwater workers

7220 Blacksmiths, tool-makers and related trades workers

7221   Blacksmiths, hammer-smiths and forging-press workers

7222   Tool-makers and related workers

7223   Machine-tool setters and setter-operators

7224   Metal wheel-grinders, polishers and tool sharpeners

7230   Machinery mechanics and fitters

7231   Motor vehicle mechanics and fitters

7232   Aircraft engine mechanics and fitters

7233   Agricultural-industrial mechanics

7240   Electrical and electronic equipment mechanics and fitters

7241   Electrical mechanics and fitters

7242   Electronics fitters

7243   Electronics mechanics and servicers

7244   Telegraph and telephone installers and service

7245   Electrical line installers, repairers

7300   Precision, handicraft, printing and related trades workers

7310   Precision workers in metal and related materials

7311   Precision-instrument makers and repairers

7312   Musical instrument makers and tuners

7313   Jewellery and precious-metal workers

7320   Potters, glass-makers and related trades workers

7321   Abrasive wheel formers, potters and related workers

7322   Glass-makers, cutters, grinders and finishers

7323   Glass engravers and etchers

7324   Glass, ceramics and related decorative painters

7330   Handicraft workers in wood, textile, leather and related materials

7331   Handicraft workers in wood and related materials

7332   Handicraft workers in textile, leather and related materials

7340   Printing and related trades workers

7341   Compositors, typesetters and related workers

7342   Stereotypers, electrotypers

7343   Printing engravers and etchers

7344   Photographic and related workers

7345   Bookbinders and related workers

7346   Silk-screen, block and textile printers

7400   Other craft and related trades workers

7410   Food processing and related trades workers

7411   Butchers, fishmongers and related food preparers

7412   Bakers, pastry-cooks and confectionary makers

7413   Dairy-products makers

7414   Fruit, vegetable and related preservers

7415   Food and beverage tasters and graders

7416   Tobacco preparers and tobacco product makers

7420   Wood treaters, cabinet-makers and related trades workers

7421   Wood treaters

7422   Cabinet-makers and related workers

7423   Woodworking machine setters and setter operators

7424   Basketry weavers, brush makers and related workers

7430   Textile, garment and related trades workers

7431   Fibre preparers

7432 Weavers, knitters and related workers

7433 Tailors, dressmakers and hatters

7434 Furriers and related workers

7435 Textile, leather and related pattern-makers and cutters

7436 Sewers, embroiderers and related workers

7437 Upholsterers and related workers

7440 Pelt, leather and shoemaking trades workers

7441 Pelt dressers, tanners and fellmongers

7442 Shoe-makers and related workers

8000 Plant and machine operators and assemblers

8100 Stationary-plant and related operators

8110 Mining- and mineral-processing-plant operators

8111 Mining-plant operators

8112 Mineral-ore and stone-processing-plant operators

8113 Well drillers and borers and related workers

8120 Metal-processing-plant operators

8121 Ore and metal furnace operators

8122 Metal melters, casters

8123 Metal-heat-treating-plant operators

8124 Metal drawers and extruders

8130 Glass, ceramics and related plant operators

8131 Glass, ceramics kiln and related machine operators

8139 Glass, ceramics and related plant operators not elsewhere classified

8140 Wood-processing- and papermaking-plant operators

8141 Wood-processing-plant operators

8142 Paper-pulp plant operators

8143 Paper making-plant operators

8150 Chemical-processing-plant operators

8151 Crushing-, grinding- and chemical mixing-machinery operators

8152 Chemical-heat-treating-plant operators

8153 Chemical-filtering- and separating-equipment operators

8154 Chemical-still and reactor operators (except petroleum and natural gas)

8155 Petroleum and natural-gas-refining-plant operators

8159 Chemical-processing-plant operators not elsewhere classified

8160 Power-production and related plant operators

8161 Power-production plant operators

8162 Steam-engine and boiler operators

8163 Incinerator, water-treatment and related operators

8170 Automated-assembly-line and industrial-robot operators

8171 Automated-assembly-line operators

8172 Industrial-robot operators

8200 Machine operators and assemblers

8210 Metal- and mineral-products machine operators

8211 Machine-tool operators

8212 Cement and other mineral products machine operators

8220 Chemical-products machine operators

8221 Pharmaceutical- and toiletry-products machine operators

8222 Ammunition products machine operator

8223 Metal finishing-, plating and coating-machine operators

8224 Photographic-products machine operator

8229 Chemical-products machine operators not elsewhere classified

8230 Rubber- and plastic-products machine operators

8231 Rubber-products machine operators

8232 Plastic-products machine operators

8240 Wood-products machine operators

8250 Printing-, binding- and paper-products machine operators

8251 Printing-machine operators

8252 Bookbinding-machine operators

8253 Paper-products machine operators

8260 Textile, fur- and leather-products machine operators

8261 Fibre-preparing-, spinning- and winding-machine operators

8262 Weaving- and knitting-machine operators

8263 Sewing-machine operators

8264 Bleaching-, dyeing- and cleaning-machine operators

8265 Fur- and leather-preparing-machine operators

8266 Shoemaking- and related machine operators

8269 Textile-, fur- and leather-products machine operators not elsewhere classified

8270 Food and related products machine operators

8271 Meat- and fish-processing-machine operators

8272 Dairy-products machine operators

8273 Grain- and spice-milling-machine operators

8274 Baked-goods, cereal and chocolate-products machine operators

8275 Fruit-, vegetable- and nut-processing-machine operators

8276 Sugar production machine operators

8277 Fruit-, vegetable- and nut-processing-machine operators

8278 Beverage machine operators

8279 Tobacco production machine operators

8280 Assemblers

8281 Mechanical-machinery assemblers

8282 Electrical-equipment assemblers

8283 Electronic-equipment assemblers

8284 Metal-, rubber- and plastic-products assemblers

8285 Wood and related products assemblers

8286 Paperboard, textile and related products assemblers

8290 Other machine operators and assemblers

8300 Drivers and mobile-plant operators

8310 Locomotive-engine drivers and related workers

8311 Locomotive-engine drivers

8312 Railway brakers, signallers and shunters

8320 Motor-vehicle drivers

8321 Motor-cycle drivers

8322 Car, taxi and van drivers

8323 Bus and tram drivers

8324 Heavy truck and lorry drivers

8330 Agricultural and other mobile-plant operators

8331 Motorised farm and forestry plant operators

8332 Motorised farm and forestry plant operators

8333 Crane, hoist and related plant operators

8334 Lifting-truck operators

8340 Ships deck crews and related workers

9000 Elementary occupations

9100 Sales and services elementary occupations

9110 Street vendors and related workers

9111 Street food vendors

9112 Street vendors, non-food products

9113 Door-to-door, telephone salesperson

9120 Shoe cleaning and other street services elementary occupations

9130 Domestic and related helpers, cleaners and launderers

9131 Domestic helpers and cleaners

9132 Helpers and cleaners in offices, hotels and other establishments

9133 Hand-launderers and pressers

9140 Building caretakers, window and related cleaners

9141 Building caretakers

9142 Vehicle, window and related cleaners

9150 Messengers, porters, doorkeepers and related workers

9151 Messengers, package and luggage porters and deliverers

9152 Doorkeepers, watchpersons and related workers

9153 Vending-machine money collectors, meter readers and related workers

9160 Garbage collectors and related labourers

9161 Garbage collectors

9162 Sweepers and related labourers

9200 Agricultural, fishery and related labourers

9210 Agricultural, fishery and related labourers

9211 Farm-hands and labourers

9212 Forestry labourers

9213 Fishery, hunting and trapping labourers

9300 Labourers in mining, construction, manufacturing and transport

9310 Mining and construction labourers

9311 Mining and quarrying labourers

9312 Construction and maintenance labourers: roads, dams and similar constructions

9313 Building construction labourers

9320 Manufacturing labourers

9321 Assembling labourers

9322 Hand packers and other manufacturing labourers

9330 Transport labourers and freight handlers

9331 Hand or pedal vehicle drivers

9332 Drivers of animal-drawn vehicles and machinery

9333 Freight handlers

V65 - Q19b [ISCO88]: And in your current job, what is your main occupation?

Q19b

And in your current job, what is your main occupation? If you are not working now, please tell us about your last job. Describe fully, using two words or more (do not use initials or abbreviations).

<Answers to Q19b must be coded to the international Labour Office's International Standard Classification of Occupations 1988 - the full 4 digit code. Q19b is identical to the standard background variable ISCO88.>

V67 - Q21a How much money would be left if the home you and your family live in was sold without any debts?

Q21a

About how much money would be left if the home or apartment you and/or your immediate family live in was sold, and any debts on it, such as a mortgage or personal loan, would have been paid off?

(Please give your best estimate. Tick only one box.)

<Answer categories for Q21ab can vary between countries. Use the following guidelines for developing the categories: Categories 1-2 are reserved; choose the midpoint of category 7 to be equivalent of the expected mean wealth using external information; choose midpoints of categories 3 and 11 to be equivalent to approximately 1/6, respectively 6x the midpoint of category 7, interspace other categories evenly between 3, 7 and 11, add open ended category 12 consistent with 11, replace EUR with the appropriate equivalent in your country.>

99998   Can't choose

99999   No answer

Note:

/HR: In 21a answers are expressed in EURO while 21b in KUNA. Real-estate prices are mostly expressed in euros and even credit loans for real-estate have so far been mostly in euro. For savings it is easier for people to calculate in kuna and since majority of Croatians do not

have savings or have very little, it is easier to express it in kuna.

/TR: For the Turkish questionnaire the suggested monetary categories of the basic questionnaire have been transferred into the corresponding Turkish currency amounts and have been converted back to EUR for the integrated dataset.

V68 - Q21b About how much money would be left if you and/or your immediate family converted to cash all savings?

Q21b

About how much money would be left if you and/ or your immediate family converted to cash all savings, stocks, or bonds you own, and then paid off any personal debts you have (not including any home loan)?

(Please give your best estimate. Tick only one box)

<Answer categories for Q21ab can vary between countries. Use the following guidelines for developing the categories: Categories 1-2 are reserved; choose the midpoint of category 7 to be equivalent of the expected mean wealth using external information; choose midpoints of categories 3 and 11 to be equivalent to approximately 1/6, respectively 6x the midpoint of category 7, interspace other categories evenly between 3, 7 and 11, add open ended category 12 consistent with 11, replace EUR with the appropriate equivalent in your country.>

99998   Can't choose

99999   No answer

in Venezuela (VE):

1   Nothing, just debts

Note:

/HR: In 21a answers are expressed in EURO while 21b in KUNA. Real-estate prices are mostly expressed in euros and even credit loans for real-estate have so far been mostly in euro. For savings it is easier for people to calculate in kuna and since majority of Croatians do not have savings or have very little, it is easier to express it in kuna.

/VE: Bs.F.=VEF

V78 - Q25c Describe yourself as [14-15-16]: I worked hard to maintain my perform on a school assignm

Q25

Please think about the time when you were <14-15-16> years old (or before, if you left school at a younger age). How would you describe yourself at the time?

(Please tick one box on each line)

Q25c I worked hard to maintain my performance on a school assignment, even if it would take a long time to start producing any results.

MARITAL - R: Marital status

Marital status

<The aim of this variable is to measure the legal status. Cohabitation outside a formal marriage should be coded separately in variable COHAB.>

AT FR: Are you ...?

AU CL JP SK TW ZA: What is your current marital status?

BE-FLA: Are you married, widowed, divorced, separated but still married or single (never married)?

CH: Now, let's talk about your family. Do you have a spouse/ partner? Do you currently live with your husband (wife)/ your partner? Here is a card with possible family situations. Can you please tell me which letter corresponds best to your actual situation?

CY IL PH VE: Marital status

CZ: Now we would like to ask about your family. What is your marital status?

DE: What is your marital status? Interviewer Instruction: Please read statements aloud.

DK: What is your current legal marital status? Are you ...?

ES LV PL PT SI: What/which is your marital status?

FI: At the moment, are you ...?

GB: Derived variable.

HR: Marital status of respondent (legal status)

IT: What is your marital status?

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

LT NO: What is your current legal marital status?

NZ: Which of these categories best describes your current marital status?

RU IS: What is your marital status?

SE: Are you married, living together, or single?

TR: May I learn your marital status?

UA: What is your marital (legal) status?

US: Are you currently married, widowed, divorced, separated, or have you never been married?

1 Married, living with legal spouse

2 Widowed

3 Divorced

4 Separated (married but separated/ not living with legal spouse)

5 Single, never married

9 No answer, refused

in Australia (AU):

5 Single, never married or in de facto relationship

in Switzerland (CH):

1 Married/ Remarried/ In a civil partnership

2 Widowed/ Previously in a civil partnership (partner deceased)

3 Divorced/ Previously in a civil partnership not valid anymore

4 Separated (but still married)/ Separated (but still in a civil partnership)

5 Single, never married AND never in a civil partnership

in Chile (CL):

3   Divorced and annulled

in Finland (FI):

1   Married or in registered partnership

5   Never/ Not married (Single and living as married)

in Great Britain (GB-GBN):

1   Married or in Civil Partnership

5   Including living as married

in Korea (South) (KR):

5   Never married/ Cohabiting

in Norway (NO):

1   Married or in civil partnership (same sex)

in Poland (PL):

5   Never married, living as married

in Sweden (SE):

5   Single or living together with partner without being married

in Taiwan (TW):

5   Single and never married/ Cohabited

in Venezuela (VE):

5   Single, never married, unmarried partner

COHAB - R: Steady life-partner

Steady life-partner

AT: Do you live together with a constant male or female partner?

AU CL NZ ZA: Do you live together with a partner?

BE-FLA: Are you living together with a partner?

CH: Now, let's talk about your family. Do you have a spouse/ partner? Do you currently live with your husband (wife)/ your partner?

CY: (If Single) Does he/she live with a partner without being married?

CZ: Do you live together with a steady partner?

DE: Do you have a steady life partner? A steady partner also means a partner one does not live with.

DK: Are you living with a steady life-partner?

ES: Do you live together with a partner at present time?

FI: Are you at the moment cohabiting with a spouse or steady partner?

FR: If you are not married, do you live maritally today?

GB: Derived variable.

HR: Do you live together (in the same household) with partner?

IS: Do you live together with a partner?

IL: Do you live with a permanent partner without marriage?

IT: What is your marital status? Do you live with your husband/ wife, or with you partner?

JP: Are you currently living with any person of the opposite gender?

KR: Derived from 'Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?'

LT: Do you have a spouse or a steady partner and, if yes, do you share the same household?

LV: Do you have a steady life-partner you live together?

NO: Are you currently living with a partner?

PH: Do you have a live-in partner at present or not?

PL: Derived from 'What is your marital status?'

PT: You already told me that you were widowed/ divorced/ separated/ single. So, do you live together with a partner?

RU: Do you live with somebody as a husband or a wife but without legal registration?

SE: Derived from 'Are you married, living together, or single?'

SK: Have you got a steady partner?

SI: Do you now live with a partner? It doesn't matter if you are married or not married to him/ her.

TR: Despite being legally not married, like having only a religious wedding, do you live together with a partner?

TW: Derived from 'What is your current marital status?'

UA: Do you have a steady partner whom you live with?

US: Are you currently married, widowed, divorced, separated, or have you never been married? What is member of the households

relationship to the spouse of the head of the household?

VE: Do you have a steady partner?

0   NAP (married and living with legal spouse, Code 1 in MARITAL)

1   Yes

2   No

9   No answer, refused

in Lithuania (LT) :

1   Yes, have partner (Yes, we share a household/ Yes, but we do not share a household)

2   No, I have no partner

in Slovakia (SK):

1 Yes (Yes, we share a household / Yes, but we do not share a household)

in Venezuela (VE):

1 Yes, I have a steady partner and partner lives in this home/ Yes, I have a steady partner but partner does not live in this home

EDUCYRS - R: Education I: years of schooling

Education I - Years of schooling

AT: Derived from AT_DEGR.

AU: All up, how many years of education have you completed? (Please include all primary and secondary schooling, and studies you've undertaken after high school (i.e. TAFE and university). If your study was part-time, give the number of years of equivalent full-time study). What is the highest level of high school education you have completed?

BE-FLA: Derived from 'At this moment you are not in paid work. What is your situation right now?' and 'At this moment you are still in school. What kind of education do you follow?' and 'How many years of primary education did you complete?' and 'How many years of secondary education did you complete?' and 'How many years higher education of short or long type or university did you complete?'

CH: (Which is the higher education level you finished?) How many years of full-time studies did you achieve since the first primary year and without counting the possible years of apprenticeship? At what age did you stop full time schooling or full time vocational training?

CL: Without taking into account grade repetitions, how many approved years of study do you have?

CY: Education: How many years in total?

CZ: Can you please count how many years in total you attended school? Include also years of your primary school. Do not include evening schools or extramural study.

DE: recoded from: What general school leaving certificate do you have? What vocational or professional training do you have?

DK: How many years of full time schooling do you have? Are you still attending a school education? Are you still attending a vocational training or a higher education?

ES: Have you gone to school or taken any kind of courses? How many years were you at school or taking (official) courses with full-time dedication?

FI: How many years have you gone to school or studied altogether (including possible university studies but excluding work placement)? Please respond even if you are still studying at primary, secondary school or at polytechnic or university.

FR: Derived from 'How old were you when you stopped your studies?'

GB: Derived from 'How old were you when you completed your continuous fulltime education?'

HR: How many years did you regular schooling last?

IL: Years of schooling

IS: How many years have you completed in school, beside vocational training?

IT: At what age did you quit the education system? Are you currently enrolled in any school grade? If so, which one?

JP: Please indicate the last school you attended or the school you are currently attending. How many years of education did you receive from the time you entered elementary school to the time you graduated or left your final place of education? Do not include any time spent at "cram schools", higher vocational schools or schools in the miscellaneous category.

KR: Derived from 'What is the highest level of school you have attended?' and 'Did you graduate from this school, or are you currently attending?' and 'In what grade did you drop out?' and 'What grade are you in?'

LT: How many full years of schooling or education have you had? Please indicate how many years of schooling or education in primary, secondary, basic, vocational or gymnasium school, college, university ore institute have you completed. If you repeated year or course several times, count only the first year.

LV: In total, how many years have you studied (at school, vocational school, University, but not including improvement of professional skills or vocational courses)?

NO: How many years of education have you completed, all in all? Count all education, including compulsory schooling.

NZ: Derived from 'Which one of these categories best describes the amount of formal education you have had?'

PH: How many years have you attend formal schooling? This does not include vocational training.

PL: Derived from 'What is the level of education that you have obtained until now?' and 'Are you currently in school or studying at the university?'

PT: I would like to ask you now about your education level. For how many years did you go to school, including the years that you had to repeat and university studies (but not professional training courses or lectures, or training internships)?

RU: How many years have you completed in all educational institutions including primary , secondary and tertiary school but excluding training courses.

SE: In total, how many years have you been in fulltime education? Count from the low stadium of the comprehensive school!

SI: Duration of your regular schooling?

SK: How long did your educational background last? Please count all years of full time schooling if you did not finish the school. Don't forget to count basic school. Don't count evening or distance study. Don't include time spent on professional training or re-qualification.

TR: What is your education? How many years have you spent in primary, secondary and university education other than professional training?

TW: How many years of formal education do you have?

UA: How many years have you been studying (including studying in secondary school, specialized school, technical secondary school, college, university, but not including training courses, probation etc. - round incomplete years up)?

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma or a GED certificate? Did you ever complete one or more years of college for credit - not including schooling such as business college, technical or vocational school? How many years did you complete? Do you have any college degrees? What degree or degrees?

VE: Derived from 'What was the last grade, year or semester approved by you and what level of education?'

ZA: How many years of full time education have you completed?

1   1 year or less

81   81 years

95   Still at school

96   Still at college,university

97   No formal schooling, no years

98   Don't know

99   No answer, refused

in Italy (IT):

97   Not used

DEGREE - R: Education II-highest education level

Education II - Highest education level: Harmonized categories of country specific degree and/ or years of education variable

AT: Which is the highest educational level you have finished?

AU: What is the highest level of high school education you have completed? What is the highest level of education you have completed since leaving high school?

BE-FLA: What is the highest degree you completed? At this moment you are still in school. What kind of education do you follow?

CH: Which is the higher education level you finished?

CL: Without taking into account grade repetitions, what is your educational level?

CY: What is the highest level of education you completed?

CZ: What is your highest achieved level of education?

DE: What general school leaving certificate do you have? What vocational or professional training do you have?

DK: What school education do you have? What business training or higher education do you have beyond school education?

ES: Have you gone to school or ever taken any kind of courses? Which are the highest level studies that you have done (whether you have finished them or not)? Please specify as much as possible, telling me the level (year) you were in, when you finished (or interrupted them), and also the name those studies had then (if different).

FI: What is your education?

FR: What is your education level?

GB: Have you passed any of the examinations on this card? (If yes) Please tell me which sections of the card they are in.

HR: Your highest educational level (school completed regularly or part-time).

IL: Highest education level.

IS: What is your highest degree?

IT: What is the highest degree you attained?

JP: Please indicate the last school you attended or the school you are currently attending.

KR: Derived from EDUCYRS.

LT: What is the highest level of education that you have attained?

LV: Your education (highest education level):

NO: Which general education have you achieved? Which vocational education/training have you achieved? Which tertiary education have you achieved?

NZ: Which of these categories best describes your highest formal qualification?

PH: What is your highest educational attainment?

PL: What is the level of education that you have obtained until now?

PT: Which level of education did you completed? If none of the options presented in the card corresponds to your case, please, provide a detailed description of the level of education you achieved?

RU: What is your highest education level?

SE: What is your highest level of education at present?

SI: Name last school that you have finished, regularly or irregularly.

SK: What is your highest achieved education level?

TR: Levels of education/ Highest degree being holded by the respondent

TW: What is your highest education level?

UA: What is the highest level of education you have obtained so far?

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma or a GED certificate? Did you ever complete one or more years of college for credit - not including schooling such as business college, technical or vocational school? How many years did you complete? Do you have any college degrees? What degree or degrees?

VE: What was the last grade, year or semester approved by you and what level of education?

ZA: What is the highest level of education you have ever completed?

0   No formal qualification

1   Lowest formal qualification

2   Above lowest qualification (qualifications which are above the lowest qualification, but below the usual entry requirement for universities (intermediary secondary completed))

3   Higher secondary completed ((usual) entry requirement for universities (the German Abitur, the French Bac, English A-level, etc.))

4   Above higher secondary level, others (qualifications which are above the higher secondary level, but below a full university degree)

5   University degree completed, graduate studies

8   Don't know

9   No answer

in Australia (AU):

0   Did not complete High school to year 10

1   Completed High School to year 10

2   Not used

in Czech Republic (CZ):

1   Incomplete primary/ Primary completed

in Finland (FI):

0   Still at school (primary, secondary, vocational)

in Great Britain (GB-GBN):

0   No secondary qualification

1   Including foreign or other qualification

in Italy (IT):

0   No degree

in Japan (JP):

1   Including still at school (High school)

3   Including still at college (Junior college)

in Korea (South) (KR):

0   No formal schooling, old-style education, 1-5 years in school/ Primary incomplete

in Latvia (LV):

0   Primary school not completed (less than 8 forms)

in Poland (PL):

0   No formal schooling, incomplete elementary

in Portugal (PT):

0   None/ Basic level 1 less than 4 years

in Taiwan (TW):

0   None, self-study

in Venezuela (VE):

0   Neither reads nor writes/ Without level, but reads and writes/ Primary school incomplete

in CH PH:

0   No formal education/ Incomplete primary less than 6 years

in HR SI:

0   Primary school not completed

WRKST - R: Current employment status

Respondent: Current employment status - current economic position, main source of living

AT: Are you presently ...

AU: Which of the following best describes what you were doing last week? How many hours do you usually work each week in all jobs? Please include regular overtime.

BE-FLA: At this moment you are not in paid work. What is your situation right now? (If in paid work) Are you working full time or part time in your main profession?

CH: In your first job, after leaving full-time education, for whom did you work? (If not 'never had paid job') Are you currently working full time or part time or are you not working for pay? (If 'not working for pay') For what reason aren't you working actually?

CL: Please choose one of the following alternatives, depending whether you are working or not working.

CY: Current employment status.

CZ: What is your current economic status, your main source of living?

DE: Please classify your current employment and your occupational status

DK: Are you currently employed?

ES: Which of the following situations applies to you at present? (Current or most recent job)

FI: Which of the following best describes your current situation?

FR: What is your current occupation or your current economic position?

GB: Which of these descriptions applied to what you were doing last week, that is the seven days ending last Sunday? In your present job, are you working full-time or part-time? In the seven days ending last Sunday, did you have any paid work of less than 10 hours a week?

HR: What is your current employment status?

IL: Work status in present.

IS: Are you currently in a full time job, part time job, in school, working at home or something else?

IT: What is your current employment status?

JP: Are you in continuous, gainful employment? If you are involved in more than one job, indicate your main activity.

KR: Do you have a job that provides income? (If currently working) Do you work for someone else? (If working for someone else) Are you working part time or full time? (If not working for someone else/ if self-employed) Are you working for the family, self-employed with no employees, or self-employed with employees? (If not working) What is the primary reason for unemployment?

LT: Which of the following best describes your current situation? If you are temporarily away from paid work because of parental or other leave, unpaid leave or some other similar reason, please answer according to your normal work situation.

LV: Now a question about your main source of living: are you at the present ...? (one main source of living)

NO: Are you - or have you ever been in paid work? In your main job you are/were ...? How many hours do/ did you usually work per week in your main job? Presently, do you regard yourself mainly as:

NZ: Which of these categories best describes your current employment status?

PH: Current employment status.

PL: What is your current job situation? Are you currently ...

PT: What is your current professional situation?

RU: What is your current employment status?

SE: Which of the following groups do you belong to? If you are on parental- or sickness-leave, please indicate whether you worked full-time or part-time before the parental- or sickness-leave.

SI: What is your current employment status, are you employed or something else?

SK: Have you currently got an income from any working activity?

TR: Which one of the following best corresponds to your employment status?

TW: Are you currently employed?

UA: What is your current employment status?

US: Last week were you working full time, part time, going to school, keeping house, or what?

VE: Derived from 'R currently is in paid work, was in paid work or did never work' and '(If R is/ was in paid work) Which of these conditions best describes your actual situation?' and '(If R is/ was in paid work) How many hours do you work or did you work usually in a normal

week?'

ZA: What is your current employment status?

1   Employed, full-time

3   Employed, less than part-time (< 11 hours)

in South Africa (ZA):

3   Including casual work/ piecework

5   Including housewife looking for work

10   Including temporarily sick

Note:

/LT: The 2009 ISSP module was administered together with the 2010 module. Therefore the new 2010 specification for background variables was used, from which the 2009 BG variables, required for the 2009 module, were derived. In the case of the BG variable WRKST this is not fully possible (due to missing distinction between full and part time employment).

ISCO88 - R: Occupation ILO,ISCO 1988 4-digit

Respondent's Occupation: ILO/ISCO - International Occupation Code 1988

AT: Which professional activity are you carrying out in your main job or did you carry out last?

AU: What kind of work do you (or did you) do in your main job? (If unemployed, retired or had a job in the past) Please tell us about your last main paid job. (If never worked for pay) Please go to question J15. What are (or were) the main tasks that you usually perform? And what industry do you (or did you) work in? By industry, we mean the type of business or service performed where you work or worked (e.g. Commonwealth government, hairdressing, construction, hospitality).

BE-FLA: At this moment you are not in paid work. What is your situation right now? Did you used to be in paid work? (If respondent is in paid work or used to be in paid work) Can you give me the name of your current (former) profession? Can you give me a detailed description what your (former) profession implies (implied)?

CH: What is your actual occupation (principal employment)? Did you have a paid professional activity in the past? What was the last one?

CL: What is your main activity? What are some of your main duties?

CY: Occupation/ (If retired, unemployed or housewife) Last occupation.

CZ: (Those who are economically active speak about their current occupation, those who are not economically active and ever had any job speak about their last occupation, working pensioners speak about the last occupation before retirement) What is/ was your occupation or working status in your main job? What work do (did) you do?

DE: What work do/ did you have in your main/ last job?

DK: What are/were your accurate occupation?

ES: Which of the following situations applies to you at present? (If respondent is working or retired respectively unemployed but previously working) And which was your last occupation or trade? That is, in what does/ did your work consist of, specifically? We are referring to your main occupation: the one for which you (or the house head) obtains/ obtained your/ his/ her highest earnings.

FI: What is your current or latest occupation or the occupation you are currently studying for?

FR: If you are working, what is your current occupation? If you do not work but if you have already worked, what was your last occupation? (Current and last occupation ISCO88)

GB: Now I want to ask you about your (present/ last/ future) job. What (is/ was/ will) your job (be)? What (is/ was) the name or title of the job? What kind of work (do/ did/ will) you do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact name of your job title and occupation. (Most recent job if respondent currently not employed, retired or unemployed) Describe what you do, what your main tasks are. What are the educational and professional requirements for your job?

IS: What is your current occupation? If you are not working now, please inform us about your last job. Describe it thorough, with two words or more.

IT: Can you describe in full details what is your current/ last job?

JP: Please give details about the main type of work you are engaged in.

KR: Do you have a job that provides income? (If currently not working) Have you ever worked for pay? What kind of work do you normally do? What do you actually do in that job? If currently not working, tell me about your last job. (If currently working or have ever worked for pay for one year or more) Occupation.

LT LV: (If in paid work now or ever) What is your occupation? (Occupation, sector, position according to main source of living and if respondent has no current job - retired, unemployed etc. - most recent occupation.)

NO: (If in paid work now or ever) What is/ was your work title (main job)?

NZ: What is your main occupation (or most recently occupation?) If you have more than one job, business or professional practice, please give the occupation for the job you spend the most time at. Please describe fully, using two words or more.

PH: What is your main job? (If currently unemployed the most recent job)

PL: What kind of work do you/ did you normally do? That is, what is/ was your job called? What do/ did you actually do in that job? Tell me what are/ were some of your main duties? How is/ was your job title? What do/ did they produce, what services did they provide, what is (was) the main profile of the place you work(ed) in? (If farmer profile of farm and its size)

PT: What is/ was your professional activity?

RU: What is/ was your current/ recent occupation? description

SE: What is your occupation? If you are retired or not working at the moment, please indicate what your occupation was in your last job. What

kind of production/ activity is performed at your current or last workplace?

SI: What kind of work or occupation do you do? If not working at the moment: what was your last (main) occupation before losing your job or becoming retired. Tell detailed name of your position at work and exact profession.

SK: Please, write the name of your main occupation. Include detailed description of your working activity: what is your principal activity, responsibility etc. If you are not in labour force (retired or unemployed) at the moment, think of your most recent job. If you are self-employed or entrepreneur, please specify the area of your business.

TR: What is your occupation? Open ended question answers are then coded according to ISCO occupation descriptions

TW: What is your main occupation (at present, or prior to retirement)?

UA: (If in paid work now or ever - current job if presently in paid work, most recent job if no current job but job in the past) What is your occupation and position at your principal place of employment?

US: What kind of work do/did you normally do? That is, what is/was your job called? What do/did you actually do in that job? Tell me what are/were some of your main duties?

VE: What is the occupation, job or type of work that you do (or did) in the business, agency or company where you work or worked?

ZA: What is your current occupation? (Most recent job if currently not employed)

0   Not applicable, never had a job, not in paid work

9999   No answer

in Venezuela (VE):

0   Not applicable, not/ never in labour force (code 0 in WRKST)

WRKTYPE - R: Working for private or public sector or self employed

Private versus public sector or self-employed:

(If R is employee in current/ previous job) Do you work at present or did you work in your last job in the private or public sector?

AT: Where do you work now/ where have you worked last?

AU: Who do (or did) you work for in your main job?

BE-FLA: Derived from 'On card 2, you can see a list with a number of professional categories. Take a close look at this list. Can you tell me which category corresponds with your main (former) job?' and 'Do you work for the government or in the private sector?'

CH: In your current job, for whom do you work? If you are not working now, please tell us about your most recent job.

CL: Please choose one of the following alternatives, regarding whether you work in the public or private sector. (Principal activity. If not working now, most recent job)

CY: Public or Private Sector- Respondent. (If not employed now, last occupation)

CZ: Do you work (in your last job did you work) in:

DE: Please classify your current employment and your occupational status.

DK: Are/ were you in public or private employment or self-employed? (Main occupation)

ES: Do you (or the head of household) work (or used to work) in the Public Administration, in a public company, in a private company, in a non-profit organization or in house-keeping?

FI: Is your employer the state, a municipality, a state-owned enterprise or a private enterprise? If you are currently not working please answer according to the last job.

FR: If you are working, are you?

GB: Which of the types of organisation on this card (do you work/ did you work/ will you be working) for?

HR: Where do you currently work? If you are not currently working answer about your most recent job?

IL: (If currently in labour force) Work for private, public sector; self employed?

IS: In your current job, for whom do you work? If you are not working currently, please tell us about your most recent job.

3   With a job, but not at work because of temporary illness, vacation, strike

4   Unemployed, laid off, looking for work

in South Africa (ZA):

3   Including casual work/ piecework

5   Including housewife looking for work

10   Including temporarily sick

Note:

/LT: The 2009 ISSP module was administered together with the 2010 module. Therefore the new 2010 specification for background variables was used, from which the 2009 BG variables, required for the 2009 module, were derived. In the case of the BG variable SPWRKST this is not fully possible (due to missing distinction between full and part time employment).

SPISCO88 - Spouse, partner: Occupation ILO,ISCO 1988 4-digit

Spouse/ partner Occupation: ILO/ISCO - International Occupation Code 1988

AU: What kind of work does (or did) your partner do in their main job? (If partner unemployed, retired or had a job in the past) Please tell us about their last main paid job. What are (or were) the main tasks that your partner usually performs? And what industry do they (or did they) work in? By industry, we mean the type of business or service performed where they work or worked (e.g. Commonwealth government, hairdressing, construction, hospitality). (If partner never worked for pay questions omitted)

BE-FLA: (If married or living together with partner) What's your partner's situation right now, what does he do for a living at the moment? (If partner is not in paid work now) Did your partner used to be in paid work? (If partner is in paid work or used to have paid work) Can you give me the name of the present (former) profession of your partner? Can you give me a detailed description what the profession of your partner implies?

CH: (If respondent has a partner - married or not - and lives with him) Which profession does your partner practice? (If partner 'not working for pay') Did your partner have a paid professional activity in the past? Which one was the last one?

CL: (If respondent has spouse or partner) What is your spouse or partner main activity? What are some of your main duties?

CY: (If respondent has spouse/ partner) Occupation of spouse. (If spouse/ partner retired, unemployed or housewife) Previous occupation.

CZ: What is (was) the occupation of your spouse/ partner in his/ her main job? What job does (did) he/ she do? (Last occupation if partner is not currently economically active and last occupation before retirement if partner is a working pensioner)

DE: What work does/ did your husband/ wife have in his/ her main/ last job?

DK: What are/ were your spouse/ partner's accurate occupation?

ES: (If married or living with partner) And which is/ was the occupation or trade of your spouse/ partner? That is, in what does/ did his/ her work consist of, specifically? (Please be as precise as possible, describing the tasks he/ she does/ did). (Main occupation)

FI: If you are currently married or cohabiting or in a registered partnership, what is your spouse's current or latest occupation or the occupation s(he) is currently studying for?

FR: What is his/ her occupation or last occupation?

GB: Now I want to ask you about (husband's/ wife's/ partner's) (present/ future) job. What (is his, her job/ will that job be)? What (is/ was) the name or title of the job? What kind of work (do/ will) (he/ she) do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact title of your spouse/ partner's job title and occupation. Describe what he/ she does; what his/ her main tasks are. What are the educational and professional requirements for the job? (Most recent job if spouse/ partner currently not employed)

IS: What is your spouse/ partner current occupation?

IT: Can you describe in full details what is the current/ last job of your spouse/ partner?

JP: Please give details about the main type of work your spouse is engaged in.

KR: Does your spouse have a job that provides income? Has your spouse ever worked for pay? What kind of work does your spouse normally do? (If currently working or ever worked for pay) What does (he/ she) actually do in that job? If currently not working, tell me about (his/ her) last job.

LT: What is/ was your spouse's/ partner's occupation - i.e., what is/ was your spouse's/ partner's functions in his/ her main job? (Name or title of a job) In your spouse's/ partner's main job, what kind of activities does/ did he/ she do most of the time? What does/ did the firm/ organisation your spouse/ partner works/ worked for mainly make or do? I.e., what kind of production/ function is/ was performed at your spouse's/ partner's workplace?

LV: What is your spouse's/ permanent partner's occupation? (Occupation, sector, position according to main source of living and most recent job if spouse/ partner has no current job)

NO: (If married, in civil partnership or living with partner) Is your spouse/ partner currently in paid work or has she/ he ever been in paid work? What is/ was your spouse/ partner's work title (main job)?

NZ: (If married or respondent has a partner) What is your partner's or spouse's main occupation (or their most recent occupation?) If your partner or spouse has more than one job, business or professional practice, please give the occupation for the job he or she spends the most time at. Please describe fully, using two words or more.

PH: (If married or respondent has live-in partner) What is the main job of your spouse or partner? (Most recent job if currently

unemployed).

PL: (If married or in common law marriage) What kind of work does/ did your wife/ husband normally do? That is, what is/ was her/ his job title? What does/ did your wife/ husband actually do in that job? Tell me what are/ were some of her/ his main duties? What is/ was your wife's/ husband's job titled? What do/ did they produce, what services are/ were provided, what is (was) the main profile of the work-place?

PT: (If spouse/ partner's professional situation is not student, housewife or other) What is your spouse/ partner's professional activity? If the spouse/ partner is unemployed/ retired or has already passed away, refer to the last professional activity.

RU: What is/ was your spouse/partner current/ recent occupation? description

SE: What is your husband's/ wife's/ live-in partner's occupation? If he/ she is retired or not working at the moment, please indicate what his/ her occupation was in his/ her last job. Please describe it as clearly as possible. What kind of production/ activity is performed at his/ her current or last workplace?

SI: (If married or living with partner) What kind of work or occupation does your partner do? If not working at the moment: what was his/ her last (main) occupation? Tell detailed name of his/ her position at work and exact profession. Describe what do you do, what are his/ her main duties; what qualification requires his/ her work (degree, type of specialisation). Name the tools or the instruments that he/ she needs at work, what are the materials that he/ she works with: what kind of goods or services does he/ she provide?

SK: (If married or respondent has got steady partner) Please, write the name of the main occupation of your spouse/ partner. Include detailed description of his/ her working activity: what is his/ her principal activity, responsibility etc. Use two or more words and exclude abbreviations. If your spouse/ partner is not in labour force at the moment (is retired or unemployed etc), think of his/ her most recent job.

TR: What is your spouses occupation?

TW: (If married and living with spouse) What is the occupation of your spouse at present?

UA: (If respondent has partner - married or living together - in paid work now or ever) Occupation of spouse/ partner.

US: What kind of work does/did your spouse normally do? That is, what is the job called? What does/did your spouse actually do in that job? Tell me what are some of his/her main duties?

VE: Not asked.

ZA: What is your spouse/ partner's current occupation? (Most recent job if spouse/ partner currently not employed)

0   Not applicable, neither married nor living with partner (code 2 in COHAB) or spouse/ partner never had a job, not in paid work; not available: VE

SPWRKTYP - Spouse, partner: Working for private or public sector, self employed

Spouse/ partner: Private versus public sector or self-employed

Does she/ he work in the public sector at present or has she/ he ever worked in the public sector before? In her/ his main job, is (was) she/ he an employee or self-employed?

AU: Who does (or did) your partner work for in their main job?

BE-FLA: (If respondent has partner - married or living together - in paid work or who used to be in paid work) On card 14, you find a list with a number of professional categories. Can you tell me which category corresponds with the main (former) job of your partner? Does/ did your partner work for the government or in the private sector?

CH: (If respondent has a partner - married or not - and lives with him and partner actually has a paid job or had one in the past) Does/ Did your partner work ...

CL: Please choose one of the following alternatives, regarding whether your spouse or partner work in the public or private sector.

CY: (If respondent has spouse/ partner) Private or public sector of spouse/ partner. (If spouse/ partner not employed now, last occupation)

CZ: Does/ did your spouse/ partner work in:

DE: Please classify your husband's/ wife's current employment and occupational status.

DK: Are/ were your spouse/ partner in public or private employment or self-employed?

ES: Not asked.

FI: If you are currently married or cohabiting or in a registered partnership, is your spouse's employer the state, a municipality, a state-owned enterprise or a private enterprise? If your spouse is currently not working, please answer according to his/ her most recent job.

FR: Is he or were he ...?

GB: Which of the types of organisation on this card (does he, she work/ will he, she be working) for?

HR: Where does your (legal) partner work?

IL: Spouse/ partner: Work for private, public sector or self-employed?

IS: In your spouse/ partner current job, for whom does he work? If he is not working now, please inform us about his most recent job.

IT: If currently working, for whom does your spouse/ partner work? If he/ she is not working now, please tell us about his/ her most recent job.

JP: Is your spouse in continuous, gainful employment?

KR: Does your spouse have a job that provides income? (If in paid work) Does your spouse work for someone else? (If currently employed by someone else) Is your spouse employed by the government, a publicly owned firm, a private firm, or a non-profit organization? (If currently not working) Has your spouse ever worked for pay? (If worked for pay) What type of job did your spouse have lately?

LT: Was your spouse/ partner an employee, self-employed, or working for his/ her own family's business?

LV: Does your spouse/ partner work in public or private sector? (Recent occupation for not working spouses/ partners)

NO: (If married, in civil partnership or living with partner and partner in paid work now or ever) In which firm/ organization does your spouse/ partner work (main job)?

NZ: (If married or respondent has a partner) Which of these categories best describes who your partner or spouse works for (or who they worked for most recently)?

PH: (If married or respondent has live-in partner) Work sector - Where does your spouse or partner work? (Most recent job if currently unemployed).

PL: (If married or in common law marriage) What is/ was the form of ownership of this place of work? From the enclosed card please choose one answer. Are/ were your wife/ husband self-employed (owner/ co-owner) of a firm/ farm, or does/ did she/ he work for someone else?

PT: (If spouse/ partner's professional situation is not student, housewife or other) What sector does/ did your spouse/ partner work in?

RU: What type of business or enterprise does your spouse/ partner work for?

SE: Is your husband/ wife/ live-in partner self-employed or an employee? If he/ she is retired or not working at the moment, please indicate whether he/ she was self-employed or an employee in his/ her last job. Does your husband/ wife/ live-in partner mainly work in the private or in the public services? If he/ she is retired or not working at the moment, please indicate whether his/ her last job was in the private or in the public services.

SI: (If married or living with partner) Does he/ she work (did work) in private or public sector? He/ she work(ed) for ...

SK: (If married or respondent has got steady partner) Does your spouse/ partner currently work in: (if your spouse/ partner is not employed at the moment, where did she/ he work in her/ his last job?)

TR: What type of a work place does your spouse work at?

UA: (If respondent has partner - married or living together - in paid work now or ever) Where do/ did your spouse work?

VE: Not asked.

ZA: Who is your spouse or partner's employer? (Most recent job if spouse/ partner currently not employed)

0   Not applicable, neither married nor living with partner (code 2 in COHAB) or spouse/ partner never had a job, not in paid work; not available: BG, ES, US, VE

1   Work for government

BE_RINC - R: Earnings: Belgium (BE-FLA)

BE-FLA_RINC - Belgium/ Flanders: Earnings of Respondent

It is important that we can get an accurate picture of your income. We make a difference between your personal income and the income of your household. Do you have a personal income through a job, a pension, unemployment benefit, sickness benefit, job as a student, income from capital, from real estates or other incomes?

(If personal income)
By personal net monthly income we mean the total sum of your personal earnings, after tax deduction, everything included such as salary, meal tickets, retirement pay or other incomes from capital or real estates. Is your personal net monthly income higher than 2.000 euro or 80.000 Belgian francs?

(If personal income lower than 2.000 euro)
When you take a look at the categories on card 18, in which category do you place your net monthly income?

(If personal income 2.000 euro or higher)
When you take a look at the income categories on card 19, in which category do you place your net monthly income?

DE_RINC - R: Earnings: Germany

DE_RINC - Germany: Earnings of Respondent

How high is your own net monthly income? By this I mean the amount remaining after deductions for tax and social security contributions.

0   Not in income, not in pad work

22   22 EUR per month

10000   10.000 EUR per month

999990   NAP, other countries

999999   No answer

Note:

/ DE: If respondent refused to answer open ended question then income categories prompted; F109 Alphabet letter and answer categories randomly assigned:

20. A 4.000 - 4.999 € (mean: 4500 €)

01. B less than 200 € (mean: 100 €)

14. C 1.750 – 1.999 € (mean: 1875 €)

21. D 5.000 – 7.499 € (mean: 6250 €)

05. E 500 – 624 € (mean: 562 €)

04. F 400 – 499 € (mean: 450 €)

15. G 2.000 – 2.249 € (mean: 2125 €)

06. H 625 – 749 € (mean: 687 €)

17. J 2.500 – 2.749 € (mean: 2625 €)

12. K 1.375 – 1.499 € (mean: 1437 €)

07. L 750-874 € (mean: 812 €)

10. M 1.125 – 1.249 € (mean: 1187 €)

08. N 875 – 999 € (mean: 937 €)

03. P 300 - 399 € (mean: 350 €)

19. Q 3.000 – 3.999 € (mean: 3500 €)

09. R 1.000 – 1.124 € (mean: 1062 €)

11. S 1.250 – 1.374 € (mean: 1312 €)

02. T 200 – 299 € (mean: 250 €)

18. V 2.750 – 2.999 € (mean: 2875 €)

22. W 7.500 € and above (mean: 7500 €)

16. Y 2.250 – 2.499€ (mean: 2375 €)

13. Z 1.500 – 1.749 € (mean: 1625 €)

If categorical question answered then mean coded.

Continuous and categorical variable coded into one.coded.

BE_INC - Family income: Belgium (BE-FLA)

BE-FLA_INC - Belgium/ Flanders: Family income

Now I want to ask you something about the income of your household. By household we understand the household of married persons or persons living together, a person living alone or someone who still lives with his/ her parents.

By net monthly income of the household we mean the total sum of the earnings, after tax deduction, everything included such as salaries, meal tickets, child benefits, retirement pay or other incomes from capital or real estates. Is the net monthly income of your household larger than 2.000 euro or 80.000 Belgian francs?

(If income lower than 2.000 euro)

When you take a look at the categories on card 20, in which category do you place your net monthly income of the household?

(If income 2.000 euro or larger)

When you take a look at the income categories on card 21, in which category do you place your net monthly income of your household?

DE_INC - Family income: Germany

DE_INC - Germany: Family income

How high is the total net monthly income of your household? By this I mean the amount remaining after deductions for tax and social security contributions. (If answer refused, anonymity mentioned, card with income categories displayed and respondent asked for alphabet letter.)

0   No income
100   100 EUR per month
14000   14.000 EUR per month
999990   NAP, other countries
999999   No answer

Note:

/ DE: If respondent refused to answer open ended question then income categories prompted; Alphabet letter and answer categories randomly assigned:

20. A 4.000 - 4.999 € (mean: 4500 €)
01. B less than 200 € (mean: 100 €)
14. C 1.750 – 1.999 € (mean: 1875 €)
21. D 5.000 – 7.499 € (mean: 6250 €)
05. E 500 – 624 € (mean: 562 €)
04. F 400 – 499 € (mean: 450 €)
15. G 2.000 – 2.249 € (mean: 2125 €)
06. H 625 – 749 € (mean: 687 €)
17. J 2.500 – 2.749 € (mean: 2625 €)
12. K 1.375 – 1.499 € (mean: 1437 €)
07. L 750-874 € (mean: 812 €)
10. M 1.125 – 1.249 € (mean: 1187 €)
08. N 875 – 999 € (mean: 937 €)
03. P 300 - 399 € (mean: 350 €)
19. Q 3.000 – 3.999 € (mean: 3500 €)
09. R 1.000 – 1.124 € (mean: 1062 €)
11. S 1.250 – 1.374 € (mean: 1312 €)
02. T 200 – 299 € (mean: 250 €)
18. V 2.750 – 2.999 € (mean: 2875 €)
22. W 7.500 € and above (mean: 7500 €)
16. Y 2.250 – 2.499€ (mean: 2375 €)
13. Z 1.500 – 1.749 € (mean: 1625 €)

If categorical question answered then mean coded.

Continuous and categorical variable coded into one.

If single household then respondents income coded.

HOMPOP - How many persons in household

Size of household: Number of people currently living in local household of Respondent, including Respondent.

AT: How many persons - including yourself - live in your household?

AU: How many people live in your house (including yourself)?

BE-FLA: Including yourself, your partner, your children and others, how many people live here as members of this household? (Including partly living in household or temporarily absent.)

CH: Of how many people is your household/ family compounded, including yourself?

CL: How many people live in your home? (Including babies, children and adults)

CY: How many persons live in your household? (Include yourself)

CZ: How many members including yourself are there in your household? As household we understand individuals residing in one apartment or family house, who together financially manage the household.

DE: Apart from yourself, are there other people living in your household? Please count toddlers or people who normally live here but are currently absent, e.g. in hospital or on holiday. Apart from yourself there are [number] of people living in your household.

DK: How many persons live in your household (including yourself)?

ES: How many people do live in your household, including yourself, and any servants you may have, if they sleep at home?

FI: How many people live in your household: Total number.

FR: Derived from 'Independently of you, for every person of your household, could you say to me what is their age and their sex, by beginning with the youngest?'.

GB: Thinking now of everyone living in this household, including children: Including yourself, how many people live here regularly as members of this household?

HR IS: How many persons (including you) live in your household?

IT: How many people live in your household, excluding you and your spouse/ partner, and also excluding domestic helpers, roomers, and relatives who have been away for six months or more? Do you live with your husband/ wife, or with your partner?

JP: How many people are there in your household, including yourself?

KR: How many family members, including yourself, presently reside in your home? Do not include those who are temporarily living elsewhere due to schooling, employment, military service, etc.

LT: Including yourself, how many persons - including children - usually live in your household: persons in household in total?

LV: How many adults live in your family (18 years old and older)? How many children less than 18 years live in your family?

NO: How many people live in your household, yourself included?

NZ: Including yourself, how many people are there in your household?

PH: Number of persons in household; including servants, transients, or boarders - derived variable.

PL: Number of persons - derived from Household Member Card compiled at interview.

PT: How many people live in your house? (Including you and people who are not part of your family, for example, guests, employees, etc.)

RU: How many persons are in your household including yourself, all adults and children?

SE: How many persons are there in your household? (Count yourself also!)

SI: Name number of persons living together in household - including yourself.

SK: Derived from 'How many adults (18 years and older) live in your household? Include yourself.' and 'How many children less than 18 years live in hour household?'

UA: How many persons (including you) live with you as a same household?

TR: How many people, including yourself, live in this household?

US: Please tell me the names of the people who usually live in this household. Let's start with the person or one of the persons who own or rent this home.

VE: Including yourself and children and young people, how many people usually live in your home?

ZA: Derived from household roster.

1   1 person

2   2 persons

3   3 persons

4   4 persons

5   5 persons

6   6 persons

7   7 persons

HHCYCLE - Household composition: children and adults

Household cycle - Household composition

AT: How many persons - including yourself - live in your household? How many persons in your household are children under 18 years of age?

AU: How many people live in your house (including yourself)? (If more than one person) Thinking about the people OTHER THAN YOURSELF who live in your house, please tell us how old each person is and cross the option that describes your relationship with each of them.

BE-FLA: Including yourself, your partner, your children and others, how many people live here as members of this household? What year was ... (all members beside respondent) born in?

CH: How many children do you have, including adopted children? What is their name? How old are they? And for each of them: do they actually live with you in your household? (If respondent has children) And, may I ask you, does your husband/ spouse/ partner have any other children? (If the respondent doesn't have any children) And, may I ask you, does your partner have any children? How many children did he/ her have in total? (Adopted child included) What is their name? How old are the children of your partner that you have not yet mentioned? And for each of them: do they actually live with you in your household?

CL: How many adults 18 years old or older live permanently in this house? How many babies and children live permanently in this house?

CY: How many adults (18+) and how many minor (up to 17 years)?

CZ: How many members including yourself are there in your household? As household we understand individuals residing in one apartment or family house, who together financially manage the household. How many dependent children up to 18 years of age do you live with in common household?

DE: Composition of household is constructed from household list. DK: How many persons live in your household (including yourself)? How many persons in your household are under 18 years, i.e. between 0 and 17 years?

ES: (If not only one person in household) Could you tell me the sex, age and kinship relation that you have with each of those people, beginning by the eldest person?

FI: How many people live in your household? a) Total number, b) Aged 18 or older, c) Aged 7-17, d) Aged 6 or younger? Year of birth for children/ young people aged under 18 living in the household:

FR: Independently of you, for every person of your household, could you say to me what is their age and their sex, by beginning with the youngest?.

GB: Derived from the Household Grid, which contains the ages of all people in the household.

HR: Derived from household structure: number of household members in each age group - number of adults (persons older than 18 years) and children (younger than 18 years, classified into children aged 6-18 and into children younger than 6).

IL: Derived from different questions (HOMPOP, among others).

IT: We now wish to ask some information (like sex, age, occupation) concerning those who live with you. Please start with the older person and end with the younger person living in your household, still excluding you and your spouse/ partner. Do you live with your husband/ wife, or with your partner?

JP: How many people are there in your household, including yourself? How many people in the household are aged 17 or under?

KR: Now I would like to ask you about your family members. Please include all family members who are living in your home, or who are temporarily living somewhere else, or those who are not your family members but are living in your home. Answer the following questions beginning with yourself. How old is [PERSON]? Is [PERSON] living in your home, or is [PERSON] temporarily living elsewhere?

LT: Including yourself, how many people – including children – usually live in your home (household)? Adults of 18 years and older; Children between 7 and 17 years of age; Children up to the age of 6.

LV: How many adults live in your family (18 years old and older)? How many children less than 18 years live in your family?

NO: How are the household members distributed on age groups? (Age groups: 0-2, 3-5, 6-12, 13-17, 18 years or more) Write in number of household members at all lines with any household members.

NZ: Including yourself, how many people are there in your household? How many children under the age of 18 are in your household?

PH: Household composition: adults and children (less than 18 years); excluding servants, transients, boarders - derived variable.

PL: Household composition - derived from Household Member Card compiled at interview regarding the age of household members.

PT: How many adults and underage (less than 18 years old) family members, including you, live in your house?

RU: Now tell me about all members of your family - who are they related to you, their sex, age and month of their birth

SE: How many persons are there in your household? (Count yourself also!) How many persons in your household are between 7 and 17 years? How many persons in your household are below 7 years?

SI: All persons in household, persons aged 18 and over in household, children from 6 to 17 years of age and children under 6 years of age.

SK: How many adults (18 years and older) live in your household? Include yourself. How many children less than 18 years live in hour household?

TR: How many grown ups, including yourself, and how many children, live in this household?

UA: How many adults (including you) and children (less than 18 years) are in your household? (Children aged over 18 considered as adults).

US ZA: Derived from household roster.

VE: How many children under 7 years live in this household? How many young people between 7 and 17 years live in this household? And how many adults over 18 years live in this home?

0   Not available: Iceland

1   Single household

2   1 adult, 1 child

3   1 adult, 2 children

4   1 adult, 3 or more children

5   2 adults

6   2 adults, 1 child

7   2 adults, 2 children

8   2 adults, 3 or more children

9   3 adults

10   3 adults plus children

11   4 adults

12   4 adults plus children

13   5 adults

14   5 adults plus children

15   6 adults

16   6 adults plus children

17   7 adults

18   7 adults plus children

19   8 adults

20   8 adults plus children

21   9 adults

22   9 adults plus children

23   10 adults

24   10 adults plus children

25   11 adults

26   11 adults plus children

27   12 adults

28   12 adults plus children

95   Other

99   No answer, refused

Note:

/IT: For variable HHCYCLE 1 person has been added to account for respondent (adult/ child) and 2 persons in case respondent lives with spouse/ partner.

/VE: Obviously, the second information on children between 7 and 17 years is omitted during the data processing by the prinicpal investigator.

PARTY_LR - R: Party affiliation: left-right (derived from nat_party affiliation)

Political party affiliation: left/ right placement - derived from NAT_PRTY

<Question text see NAT_PRTY>

Not derived from NAT_PRTY:

FR: About politics, people speak about left and about right. Where do you think you stand on a scale which goes from 1 to 10, in which 1 represent the position most to the left and 10 most to the right?

IT: In politics there is usually a right and a left. Where would you place yourself?

KR: To what degree do you think yourself politically liberal or conservative?

PH: In politics, there are instances when 'left' and 'right' are mentioned by people. Where will you put yourself among the following?

SI: In politics people often talk about left or right. Where would you put yourself on scale 0 to 10, if 0 means left and 10 means right.

VE: One usually says that a person is right or left to determine the political status of each, could you tell me where you place yourself under the card 6?

0   Not applicable, not eligible, did not vote; not available: CL, CN, CY, HU, IL, TW

1   Far left etc

2   Left, center left

3   Center, liberal

4   Right, conservative

5   Far right etc

6   Other, no specification

7   No party, no preference

8   Don't know

9   No answer, refused

in Korea (South) (KR):

1   Very liberal

2   Somewhat liberal

3   Neither liberal nor conservative

4   Somewhat conservative

5   Very conservative

9   Can't choose

in South Africa (ZA):

8   Uncertain, don't know

ATTEND - R: Attendance of religious services

Church attendance

CH: How often in general do you take part to religious services?

CL DK HR IS NZ PH RU UA US VE: How often do you attend a religious service/ religious services?

DE: As a rule, how often do you go to church?

ES: (If catholic or believer in another religion) How often do you go to mass or other religious services, excluding the occasions related to social ceremonies, such as weddings, first communions, or funerals?

GB: Apart from such special occasions as weddings, funerals and baptisms, how often nowadays do you attend services or meetings connected with your religion?

IT: How often do you attend the mass or other religious services? Do not count special occasions as weddings, funerals and the like.

JP: How often do you attend a place of worship or prayer? Exclude ceremonial occasions, such as wedding or funerals.

LT: Apart gfrom such special occasions as weddings, funderals, etc., how often do you attend religious services?

SI: Do you attend religious services? How often?

SK: How often do you participate in religious services (such as masses and church services)?

TR: Taking the last year into account, how often were you able to perform salaat and worship?

TW: In general, how often do you participate in religious activities?

0   Not applicable, no religion

1   Several times a week

2   Once a week

3   2 or 3 times a month

4   Once a month

5   Several times a year

6   Once a year

7   Less frequently than once a year

8   Never

97   Refused

98   Don't know, varies too much

99   No answer

in Germany (DE):

3   Between one and three times a month

5   Several times a year

7   Less (than several times a year)

in Great Britain (GB-GBN):

5   At least twice a year

in Slovenia (SI):

5   A couple of times a year, big holidays and special events

in Turkey (TR):

1   From five times a day up to few times a week

in PH TW:

1   Everyday, several times a week

Note:

/DE: Church attendance answer categories deviate from ISSP ATTEND categories: German category 3 collapses ISSP categories 3 and 4; German category 5 implicitly includes ISSP category 6.

TOPBOT - R: Top Bottom self-placement 10 pt scale

Top - Bottom self-placement (10 pt scale)

AT: In our society, some groups are more on top and others are more at the bottom. Thinking about yourself, where would you place yourself in this scale?

AU KR LT: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to bottom. Where would you put yourself on this scale?

BE-FLA: The list on card 51 projects the place a person can have in the society. Number 1 represents a place at the bottom of society. Number 10 represents a place at the top of society. Where would you place yourself in this list? You can give a number from 1 to 10.

BG: Poor-Rich self-placement

CH: Speaking about social position: In Switzerland, there are people who are placed better than of others. Where would you place yourself on a scale from 1 to 10, if 1 is the lowest value and 10 the highest value?

CL: In our society there are groups that place themselves on the highest levels, and groups that place themselves on the lowest levels. Here is a scale that goes from the lowest to the highest level. Where on this scale would you place yourself?

CY: In our society there are groups which are high and groups which are low. Where would you place yourself in this scale which starts from lowest and goes to higher?

CZ: In our society, there are groups which are considered to have high social status and on contrary groups of low social status. Where would you place yourself on this scale?

DE: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom. Where woiuld you rank yourself on this scale?

DK: In our society one sometimes talk about, that there are some groups which are perceived as higher ranked in society and other groups which are perceived as lower ranked. Below there is a scale which runs from top to bottom. If you should place yourself on this scale where 1 is bottom of society and 10 is top of society, where would it be?

ES: In our society, there are groups that tend to occupy a high or very high position, while others occupy middle or low positions. In a scale where number 10 represents the highest social class and 1 the lowest, where would you place yourself?

FI: There are different classes in our society. Some social classes are higher and some lower. On a scale from 1 to 10 where 10 is the highest class and 1 the lowest, where would you place yourself? Please circle only one number.

FR: In our society, there are groups which are rather at the top of the society and the others which are rather below. Here is a scale which goes of the highest at the lowest. Where do you think you stand on this scale?

HR: In our society there are groups of people that hold higher or lower social position. Where would you locate yourself on the scale, that ranges from 10 (top) to 1 (bottom)?

IS: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from top to bottom. Where would you put yourself now on this scale?

IT: In your society there are people/ groups who held the top of society and groups who are at the bottom of society. Below is a scale that runs from top to bottom. Where would you put yourself on this scale?

JP: If current Japanese society were divided into 10 strata (1 being the lowest, and 10 being the highest), to which stratum do you think you belong?

LV: In our society there are groups of people which are closer to the top of the society and some which are closer to the bottom. Look at the scale. Where do you think you are on this scale?

NO: In Norway some groups of people are almost at the top of the social ladder while others are almost at the bottom. Below you will find a scale, reaching from top to bottom. Where on this scale would you place yourself?

NZ: In terms of your social status, which one of the following categories do you think you fit into?

PH: At present, where will you put yourself on this card regarding your current situation in life?

PL: In our society there are social groups that occupy higher positions and others that occupy lower positions. Below is a scale that runs from top to bottom. Where would you put yourself on this scale?

PT: In Portuguese society, there are groups that tend to be on top of the social scale and groups that tend to be in the bottom. In your opinion, where would you place yourself on a scale where 1 corresponds to the top of the scale and 10 corresponds to the bottom of the scale?

RU: Please, evaluate your place on this 10 points scale of social status now?

SE: In our society there are some groups that are seen as higher and other groups that are seen as lower. Here you find a scale from top to bottom. Where would you place yourself on this scale?

SI: There are groups in our society who are on the top and groups who are at the bottom. Here is a scale from the top (10) to the bottom (1). Where would you put yourself?

SK: Our society is divided into various social classes - upper, middle and lower. Where would you put yourself on a 10 point social classes scale, where 10 means the most upper and 1 means the most lower social class?

TR: Some people have a high some others have a low social status in society. Where would you place yourself on a ladder of social status where 1 represents the lowest and 10 the highest social status?

UA: In our society there are people who occupy high social position, and people who have low social position. In what position would you place yourself, if 1 is the lowest position, and 10 the highest position?

VE: In our society, there are groups that tend to be up at the top of the social ladder and groups that tend to be down on the base. Here you have a scale that goes from the top down. Where would you place yourself in this scale?

ZA: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Where would you put yourself on a scale of 1-10, where 10 is the top and 1 the bottom.

3   Cuyo Region (center west)

4   Northwest

5   Northeast

6   Patagonia Region (South)

Note:

/ AR: All the 24 Argentine provinces are not described in the data set. Using these information, we constructed the 6 Census regions, for the provinces considered in this sample (16).

1. The Buenos Aires Metropolitan Area is formed by Buenos Aires City plus near 32 Counties in Buenos Aires Province surrounding Buenos Aires City.

2. Cuyo: Mendoza, San Juan, San Luis.

3. Northwest: Salta, Santiago del Estero, Tucuman.

4. Northeast: Chaco, Corrientes, Misiones.

5. Pampeana: Rest of Buenos Aires Province, Cordoba, Entre Rios, Santa Fe.

6. Patagonia: Chubut, Neuquen, Rio Negro.

TR: Settlement type where the interview was undertaken.

TW: Do you think of the place you live as an urban or rural area?

US: Constructed by using XNORCSIZ and SRCBELT in US GSS. The XNORCSIZ indicates NORC size of place and SRCBELT stands for

Survey Research Center New Belt Code.

ZA: Derived from EA number and census data.

1 Urban, a big city

2 Suburb, outskirt of a big city

3 Town or small city

4 Country village

5 Farm or home in the country

ETHNIC - Family origin, ethnic group, identity

Optional: Family origin, ethnic group: coded according to a common core Nationality, Ethnic and Language Code

AR: What nationality do you have?

BE-FLA: Do you have the Belgian nationality from birth? Does your father have the Belgian nationality from birth? Does your mother have the Belgian nationality from birth?

CY: Ethnic group.

DE: What citizenship do you have? If you have several citizenships, please name all of them.

FI: Not asked - added from the registers of the fieldwork institute (Statistics Finland).

IT: Not asked.

LT: What is your nationality/ ethnicity?

LV UA: What is your ethnic identity?

NZ: Which of the following categories describes your ethnic origin? Please tick as many as you need to show which ethnic group(s) you belong to.

PH: Would you consider yourself as Bicolano, Ilocano, Ilonggo, Maranao, Maguindanao, Tagalog, Tausug, or what? (SHOW CARD)

SE: At the time of your birth, were both of your parents Swedish citizens?

SI SK: What is your nationality?

TR: Which one of the following languages or dialects can you speak? English/ German/ French, Arabic, Kurdish?

TW: What is your father's ethnic background?

US: From what countries or part of the world did your ancestors come? If more than one country named: which of these countries do you feel closer to?

VE: Not documented.

WEIGHT - Weighting factor

Weighting factor

No total weight usable for international comparism.

NATIONAL weighting procedures/ variables used for calculation of NATIONAL weights:

For detailed information please see the Study Description and the Background Variables Documentation of each country.

1   No weighting

Note:

/DE: Two separate German samples: the sample for Eastern Germany deliberately over-samples the five Eastern federal states. If all of Germany is taken as the unit of analysis (rather than the Eastern and Western states), design weight is necessary: weighting factor for Western Germany: 1,19295753*; weighting factor for Eastern Germany: 0,57980091*; recoding of the country variable is necessary (Scholz et al. forthcoming). The two weighting factors are not stored in the weight variable. * Own calculation based on data of Mikrocensus 2009; figures provided by the German Federal Statistical Office.

/IT: Weighting factor a) includes adjustment for non-response bias (gender, age: 18 groups, place of residence: 14 groups); b) is rescaled to net sample size.

/US: US WEIGHT takes into consideration a) the sub-sampling of non-respondents, and b) the number of adults in the household. It also essentially maintains the original sample size.

Study title: Social Inequality IV -ISSP2009- Argentina (Fielded within a study on Health services utilization and expenditures)

Fieldwork dates: Start date: 2010-07-08
         End date: 2010-11-01

Principal investigators: Jorge Raúl Jorrat, CEDOP-UBA

Sample type: **Stratified three-stage probability sampling. Stages: area units, households, persons. (Random selection at all stages)**.

Fieldwork institute: Cualitativo y Cuantitativo

Fieldwork methods: mode of interview: **Paper and pencil, respondent reading questionnaire**

N. of respondents: number of respondents in the final ISSP file: **1133**

Details about issued sample:		
	1. Total number of starting or issued names/addresses (gross sample size) *	……4681…..
	2. Interviews (1.0)	……1133. ..
Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	3. Eligible, Non-Interview	2723
	A. Refusal/Break-off (2.10)	…… 994…..
	B. Non-Contact (2.20)	……1729 …..
	C. Other	0
	i. Language Problems (2.33)	…… 0
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	0…..
	3. Unknown Eligibility, Non-Interview (3.0)	……… 10…..
	4. Not Eligible	815
	A. Not a Residence (4.50)	776……..
	B. Vacant Residence (4.60)	…… 34……..
	C. No Eligible Respondent (4.70)	…… 5…..
	D. Other (4.10,4.90)	……… 0……..

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):   language or languages of the field instrument : **SPANISH**

Weight present: yes or no, whether a weighting factor exists in the data-set: **NO**

Weighting procedure: exact description of the weighting procedure / algorithm

Known systematic properties of sample: description of biases or other deviations of the sample

Deviations from ISSP questionnaire: esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes

         All questions were asked as prescribed. But, unfortunately, we had a

4

« little accident ». The field work was carried out both for Social Inequality IV and Environment III at the same time. We used different questionnaires for different people within a unique sampling point, although the background part was highly similar for both questionnaires). By mistake,instructions in the background part of the questionnaires asked interviewers to ask background questions 21a and 21b to the Environment interviewees, not to the Social Inequality ones !!
However, results showed that they were not –as suspected- productive questions. For 21a, only 19.3% informed about a money range (most were non-owners, or answered DK, or refused). For 21b, only 3.5% informed about a money range.

Publications: list of publications using the present data set: **NONE**.

ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title:	ISSP 2009 Social Inequality IV
Fieldwork dates:	Start: 2009-12-2 End: 2010-02-28
Principal investigators:	Ann Evans, The Australian National University
Sample type:	The sample comprised 5,002 named respondents selected at random from the electoral role
Fieldwork institute:	Academic Surveys Australia
Fieldwork methods:	Self-completion, paper and pencil, mailed to, mailed back by respondent
N. of respondents:	1,525

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	5,002
2. Interviews (1.0)	1,525
3. Eligible, Non-Interview A. Refusal/Break-off (2.10) B. Non-Contact (2.20) C. Other i. Language Problems (2.33) ii. Miscellaneous Other (2.31, 2.32, 2.35)	823 2,632 5 17
3. Unknown Eligibility, Non-Interview (3.0)	
4. Not Eligible A. Not a Residence (4.50) B. Vacant Residence (4.60) C. No Eligible Respondent (4.70) D. Other (4.10,4.90)	0

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):	English
Weight present:	Yes
Weighting procedure:	A post-stratification or non-response weight was calculated with the aim of rebalancing the Australian sample so the weighted sample frequencies are equal to the expected frequencies in population in a the three-way tabulation by age group (five groups), sex, and educational attainment (five levels) .

The cross tabulation by age, sex and highest education level from the Australian population was done using the 2006 Census Table Builder. A table was created using sex and age (single years) in the rows, and Australian Citizenship, Highest level of education and highest year of school completed in the columns. The final table was created by excluding those who did not have Australian citizenship (this included those who did not state their citizenship). Individuals with postgraduate degrees and graduate diplomas were combined into one category. Individuals with certificates or diplomas/advanced diplomas were also combined into one

category. Those who were recorded as having their highest non-school qualification *as inadequately described, not stated* or *not applicable* were assumed not to have a post-school qualification and were coded according to their highest level of school education. Those who had had completed Year 12 were coded as having completed high-school education. Those who completed up to Year 11 or below (included those who did not state their highest level of school education) were coded as having not completed high school.

In the sample not all individuals had complete information on both age, sex and education. However imputations of weight were used to deal so that all individuals were assigned a weight even if they had missing data. If educational attainment was missing but occupational category was available, respondents were given the most common education level for their occupation (irrespective of their age). When age was missing, in some cases, this was imputed from other information available in the questionnaire. If age was missing but there was a partner listed in the household grid the respondent's age was estimated to be equal to the partner's age. If age was missing but they had child in the household, the respondent's age was estimated to be the child's age plus 30 years. Alternatively if there was a parent, the respondent's age was estimated to be 30 years younger than the parent. If there was no information that could be used from the household grid, but there was information on the respondents main activity they were given the average age of people with the same activity (e.g. if the respondent was retired, they were given the average age of retired people). For people who were missing on gender, they had a weight allocated to them that was the average of the weights over gender for their education and age.

To avoid extreme weights, the weights were trimmed at the 1 per cent and 99 per cent level, before being rescaled so that they averaged to one across all cases in each subsample.

Known systematic properties of sample:	**Gross sample** Using a sampling frame derived from the AEC Electoral Roll (2009) excludes permanent and temporary residents of Australia (who are not citizens) and any other adults in Australia who are non-citizens except for British subjects on a Commonwealth electoral roll as at 25 January 1984. These exclusions amount to approximately 8 percent of the adult population. Citizens are able to provisionally enrol at the age of 17 but are unable to vote until they turn 18. **Net sample** The AuSSA 2009 sample demographics were compared with statistics available from the Australian Bureau of Statistics (ABS) including the 2006 Census. The major biases are: age (median age is older than the Census population), education (over-representation of persons with post-secondary school qualifications), and gender (over-representation of women).
Deviations from ISSP questionnaire:	None

ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form

ISSP Study Description Form - Flanders (Belgium)

Study title:	Sociaal-culturele verschuivingen in Vlaanderen 2009 (Social-cultural changes in Flanders 2009)
Fieldwork dates:	March 13th- July 25th, 2009
Principal investigators:	Vlaamse Overheid, Studiedienst van de Vlaamse Regering (Research Centre of the Flemish Government) (SVR) (Ann Carton) Supported by a scientific committee: Prof. dr. G. Loosveldt (K.U.Leuven), Prof. dr. J. Lievens (U.Gent), Prof. dr. M. Swyngedouw (K.U.Leuven/H.U.Brussel), Prof. dr. M. Elchardus (V.U.Brussel), Prof. dr. I. Glorieux (V.U.Brussel), Prof. dr. G. Molenberghs (U.Hasselt), Prof. dr. J. Breda (U.Antwerpen)
Sample type:	Target population: Persons 18 years or more, Belgian and non-Belgian nationality, resident within private and collective households, in Flanders and Brussels (selection on Dutch addresses in Brussels).
	Sampling design: Stratified two-stage random sampling procedure Regional stratification, 5 provinces in Flanders and Brussels 1st stage: PSU are clusters of addresses localized in postcodes. The number of clusters for each postcode is proportional to the population size in each province. 2nd stage: using the National Register N=2383 addresses (2285 in Flanders and 98 in Brussels) were randomly selected within the groups born in 1991 or before in the randomly selected postcodes. No substitution but in order to cope with non-response and to reach about 1500 face-to-face interviews: oversampling within certain postcodes depending on differential regional non-response rates.
	The National Register is a national governmental institution that stores data on all residents in Belgium: name, address, gender, date of birth, nationality, and composition of the family.
Fieldwork institute:	TNS Dimarso, Brussels
Fieldwork methods:	- Survey social-cultural changes in Flanders including the standard background variables: CAPI face-to-face interviews with trained interviewers (1 day training). - ISSP-module: drop-off questionnaire arrives with interviewer, self-completion by respondent and mailed back by respondent to Research Centre of the Flemish Government. Follow-up of drop-off questionnaire by Research Centre of the Flemish Government.
N. of respondents:	N=1440 respondents in Survey social-cultural changes in Flanders of which 1115 respondents completed the drop-off questionnaire.

Details about issued sample:	1. Total number of starting or issued names/addresses (gross sample size) * — 2383
	2. Interviews (1.0) — 1115

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. *The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.*	3. Eligible, Non-Interview
	  A. Refusal/Break-off (2.10) — 745
	  B. Non-Contact (2.20) — 170
	  C. Other
	   i. Language Problems (2.33) — 106
	   ii. Miscellaneous Other (2.31, 2.32, 2.35) — 140

	3. Unknown Eligibility, Non-Interview (3.0) — 16

	4. Not Eligible
	  A. Not a Residence (4.50) — …………………..
	  B. Vacant Residence (4.60) — 91
	  C. No Eligible Respondent (4.70) — …………………..
	  D. Other (4.10,4.90) — …………………..

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

3A=refusal face to face interview by respondent (n=416) + at home but did not open the door during face to face interview (n=4) + face to face interview but no drop-off (n=325)
3B=no contact with respondent after minimum 5 attempts (n=109) + holidays during fieldwork period (n=61)
3C ii)= dead (=5) + physically or mentally unable/incompetent (n=123) + bad quality face to face interview (n=2) + technical problems sending data (n=6) + other (n=4)

Language(s): Dutch

Weight present: Yes

Weighting procedure: For the total of the drop-off questionnaires a weighting variable was computed, taking into account gender, age group and level of education (FOD Economie - Afdeling Statistiek, Enquête naar de arbeidskrachten. (Labor Force Survey, Flanders, 2008)

Known systematic properties of sample: Realized drop-off versus realized total sample: -The realized drop-off sample (N=1115) is representative for the realized total face-to-face sample (N=1440) for the variables age, gender, and level of education.

Realized drop-off versus population (based on comparison with Labor Force Survey 2008): Following groups are (slightly) under represented:
- 35-44 years old men with higher secondary education
- 35-64 years old lower educated women (primary education or no diploma)
- 75+ years old lower educated women

Following groups are (slightly) over represented:
- 18-24 years old men with lower secondary education
- 55-74 years old men with non-university higher education

- 45-54 years old women with non-university higher education
- 45-54 years old women with university higher education

Study Description

ISSP Study Description Form
Modules 2007 and 2009

Study title:	***Leisure time and social inequalities***
Fieldwork dates:	15.12.2008 – 26.01.2009
Principal investigators:	Agency for Social Analyses (ASA)
Sample type:	Two stage random sampling. The first stage of the sampling procedure was based on the list of electoral sections from the General Election 2005. Electoral sections cover the whole territory of the country and respectively provide access to the whole Bulgarian population aged 18 and over. The agency disposes of the complete list of electoral sections, which includes: its number, territorial location, and number of registered voters. Selection of electoral sections included in the sample was based on the procedure of systematic random selection. Within each selected 125 units were randomly selected on the basis of '*last birthday*' approach 8 respondents who were 18 of age and over.
Fieldwork institute:	ProField Data Partners
Fieldwork methods:	Face-to-face interview
N. of respondents:	number of respondents in the final ISSP file: **1000**

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title:	ISSP Religion III ISSP Social Inequality IV
Fieldwork dates:	The 8th of February 2008 to the 5th of September 2009
Principal investigators:	FORS, c/o University of Lausanne, Bâtiment Vidy, CH-1015 Lausanne
Sample type:	The ISSP 2008 module was integrated in the „MOSAiCH" survey in Switzerland. The sampling procedure was the following:

- Random selection of sample points stratified proportionally to the NUTSII Regions (Espace Mittelland, North of Switzerland, East of Switzerland, Center of Switzerland and Italian-speaking part of Switzerland).
- Random selection of addresses out of the mailing list of the Swiss Postal Officel in each sample point; the list of the Swiss Postal Office also contains the number of households in each building.
- Visit of the selected addresses to take down the exact indication(s) on the corresponding mailbox(es) or outside bell(s).
- Random selection of a defined number of households according to the expected target response rate.
- Sending of an information letter and a flyer on the survey to the selected households.
- At least 5 face-to-face contact attempts to fix a date for the interview. Households/persons that couldn't be reached after 5 attempts or that refused to participate were contacted again by the telephone central of the survey institute. Finally, a last conversion attempt was undertaken by sending a letter with a small questionnaire and a prepaid incentive of 10CHF. The letter again invited the households/persons to participate to an interview. If they still refused, they were invited to at least fill in the small questionnaire (giving some information on refusals).
- Random selection of one person in each household with the KISH method
- CAPI Interview

Fieldwork institute:	MIS Trend, Institut pour l'étude des marchés et les sondages d'opinion, Pont-Bessières 3, 1005 Lausanne
Fieldwork methods:	CAPI
N. of respondents:	1229

Chile
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title: National Public Opinion Study Nº 30

Fieldwork dates: Start date: 2009-05-14
End date: 2009-06-03

Principal investigators: Carolina Segovia / Centro de Estudios Públicos (CEP)

Sample type: The guiding methodological principle underlying CEP's public opinion surveys is that effective and accurate survey research must be based on a truly representative sample of the universe in question. For CEP's purpose, this universe is made up of Chilean adults 18 years of age and older. Our studies use a probability multistage cluster sample of 1,505 individuals.

The sample is designed in three stages, such that all adult individuals throughout the country have a calculable probability of being included. The 2002 Census data is consulted to determine the regional population structure of people 18 years of age and older. This makes it possible firstly to establish regional stratification and then each region is stratified by rural and urban zone. Table I shows the regional structure of the Chilean population.

Table I. Regional Breakdown of Population (%)

Region		% Population 18 years of age and older[1]	Region		% Population 18 years of age and older[1]
I	Tarapacá	2,8	VII	Maule	5,9
II	Antofagasta	3,2	VIII	Bío Bío	12,2
III	Atacama	1,6	IX	La Araucanía	5,6
IV	Coquimbo	3,9	X	Los Lagos	7,0
V	Valparaíso	10,4	XI	Aisén	0,6
VI	Libertador Bdo. O'Higgins	5,1	XII	Magallanes and Antarctic	1,0
XIII	Metropolitan (Santiago)	40,7			

[1]Source: *2002 Census Data* National Institute of Statistics.

Sampling Stages
First Stage

The first stage of the sampling process sets the number of completed interviews per cluster at 5; a cluster is defined as a block

(manzana) or populated entity *(entidad).*[1] The application of 5 interviews per cluster to the total number of interviews targeted in the sample (1,505) yields 301 primary sampling units (PSUs) to be identified in the first stage of sample selection.

The PSUs are proportionally distributed throughout the regions of the country, taking into account the region's contribution to population (both urban and rural), as described in Table II.

TABLE 2
Number of Clusters per Region

	Number of clusters		
n	Urban	Rural	Total
Tarapacá	7	1	8
Antofagasta	10	0	10
Atacama	5	0	5
Coquimbo	9	3	12
Valparaíso	28	3	31
Libertador Bdo. O'Higgins	10	5	15
Maule	12	6	18
Bío Bío	30	7	37
La Araucanía	11	6	17
Los Lagos	14	7	21
Aisén	2	0	2
Magallanes and Antarctic	3	0	3
Metropolitan (Santiago)	118	4	122
TOTAL	259	42	301

Using the most reliable digital information on hand, i.e. 2002 census data, a cumulative listing of population by province *(provincia),* borough *(comuna),* district *(distrito),* zone *(zona)* and block *(manzana)* was prepared in the urban case; and by province, borough, district, locality *(localidad)* and entity *(entidad)* in the rural case (geographically arranged).

In both the rural and the urban case a fixed interval is set for each region by dividing the total population for that region by the number of PSU's assigned to it. Within each region, a purely random selection process is followed, such that each individual (as represented by population statistics) has a calculable probability of being selected as the reference point for a PSU.

This is carried out through a computerised, random, proportionate-to-population process to select blocks in the urban areas and entities in the rural areas. A computer program is developed to select the 259 urban blocks and the 42 rural entities for the sample. All the blocks and entities are identified by number and located on a census map.

Second Stage

---

[1] Blocks *(manzanas)* are used in urban areas, while in rural areas the census equivalent is the entity *(entidad).*

The second stage in the sampling process is to select households (dwellings) within PSUs. Selection rules for households within chosen blocks and entities are provided to interviewers, to enable them to select households randomly within each cluster. After taking a census of each selected block and entity, a random walk or systematic sampling[2] procedure is followed, whereby every nth dwelling is included in the sample until a total of 5 households are identified.

Third Stage

The third stage is to select, within each household, a person to be interviewed. Interviewers are instructed to apply a random selection process (random number table) to identify the person to be interviewed.

Other Important Aspects in the CEP Sample Design

In the second and third stages, the interviewer has to make a minimum of three attempts on three different days to try to reach the original house or person to be interviewed. In these attempts the interviewer must deliver a letter signed by the CEP director explaining the nature of CEP and the aims of the study.

If the original household or person finally cannot be contacted, they are replaced. The rules for replacement are as follows:

A. Blocks and Entities

The replacement of a block or entity will occur only in the following situations:

1)   Vacant lots that could not be detected prior to sample selection

2)   Areas which are almost inaccessible

3)   Entities and/or blocks intended basically for commercial use

4)   Parks or stadiums

5)   Areas belonging to the armed forces

Blocks and entities are randomly replaced: the original selection is replaced with the one whose identification number comes immediately before that of the original. If this is not successful, the block/entity with the identification number immediately following the original selection is taken.

B. Households

Failed dwellings are accounted for as follows:

1) by outright refusal to receive the interviewer, even having received the letter from the CEP director.

2) by the absence of occupants at a house after three visits on three different days (vacations or other reasons).

3) the house is unoccupied.

4) access denied (condominiums or buildings with security guards)

5) other special cases (foreigners with whom it is impossible to communicate, etc.)

---

[2] The total number of numbered dwellings was divided by 5 (the number of interviews per cluster); this gave an interval length, such that if it was 43/5 = 8, starting from the point randomly pre-assigned as the first dwelling, the interviewers went to dwelling No 9, then to No 17, and so on until 5 interviews were completed.

Each failed dwelling is randomly replaced by another one from the same block/entity. The replacement interval is defined as (k-1), where k= the original selection interval. Starting from the last house originally selected, the interval (k-1) is added to select the first replacement house, and so on. The fieldwork treatment of replacement houses as regards the number of repeat visits is the same as for the original houses.

C. Individuals

Individuals are replaced under the following circumstances:

1) when the person selected refuses to answer the questionnaire, even after receiving the letter from the CEP director.

2) when the person selected cannot be located after three attempts on three different days, or will be away for a period longer than the duration of fieldwork.

3) the person offers to respond on a date long after the closing date of the field work.

4) individuals with serious physical or psychological handicaps which prevent them from responding (mentally handicapped, deaf and dumb, etc..)

5) the individual is physically and psychologically fit, but is ill, in bed and does not want, or is unable to respond to the survey.

6) the selected individual is a foreigner with less than 5 years in the country (unable to vote).

7) the person starts to answer but he/she does not want to finish the interview.

8) other specific cases.

In replacing individuals, the dwelling is replaced according to the rules explained above, and a random selection process chooses an individual from the new household.

It is important to bear in mind that, by using these replacement rules, the sample size achieved is always very close to 1505 (issued sample size).

Fieldwork institute: ICCOM

Fieldwork methods: Face-to-face

N. of respondents: number of respondents in the final ISSP file: 1505

Details about issued sample:	1. Total number of starting or issued names/addresses (gross sample size) *	…1686………..
Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions:	2. Interviews (1.0)	…1505………..
	3. Eligible, Non-Interview A. Refusal/Break-off (2.10) B. Non-Contact (2.20) C. Other	…121……….. …50…………..

. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	i. Language Problems (2.33) ii. Miscellaneous Other (2.31, 2.32, 2.35)	………………….. …………………..
	3. Unknown Eligibility, Non-Interview (3.0)	…………………..
	4. Not Eligible A. Not a Residence (4.50) B. Vacant Residence (4.60) C. No Eligible Respondent (4.70) D. Other (4.10,4.90)	 ………………….. …4…………….. ………………….. …6……………..

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):   Spanish

Weight present: Yes

Weighting procedure: A weighting procedure is applied in order to correct for distortions in the representativeness of the sample as regards three variables of interest: Gender, Age, (grouped in five categories: 18-24 years, 25-34, 35-44, 45-54, 55 or older) and Urbanity (classification of place of residence as urban or rural). This makes it possible to obtain a sample with characteristics similar to those of the population. The weights are constructed by calculating the quotient between the expected distribution and that observed in the cross between Urbanity, Gender and Age. The expected distribution is obtained from the 2002 census data provided by the National Institute of Statistics. The result of the weighting slightly corrects for problems of under- and over-representation among certain specific groups of the population

Known systematic properties of sample: The sample design described above has been used in the last 23 surveys and has given good results, so it can be stated that it does not have properties that might be causing some type of bias in the results

Deviations from ISSP questionnaire: Questions 21a and 21b from background variables were omitted due to problems in application detected during the pre-test.

Language(s):   Czech

Weight present: Yes

Weighting procedure: Total weight is constructed from:
1) design weights based on proportion of household sizes
2) post-stratification weights based on region, education, age and sex,.
The weights were derived from data of the Czech Statistical.
Method: raking based on loglinear modelling.

Known systematic properties of sample: The probability of selection of the member of household depends on the size of the household. Due to response differences the basic socio-demographic characteristics - sex and education - are significantly different from the known population characteristics.

Deviations from ISSP questionnaire:

- In 2008 there were new value labels for CZ_PRTY (for details see czech08labels.doc).

- Specification of income variables:
CZ_RINC: Total average net income of respondent per month in

CZK. It includes incomes from main job or business, incomes from additional gainful activities or property, rents, social incomes as are unemployment benefits, maternal benefits, allowances, etc. It does not include child allowances and state compensatory benefits for children. Income asked in categories, i.e. midpoints of categories are coded.

CZ_INC: Total average net income of household per month in CZK. It includes incomes and rents of all members of household and all social benefits, allowances and complementary incomes. Income asked in categories, i.e. midpoints of categories are coded.

Sample type:	Sampling-procedure: A representative sample (simple random sample) was drawn from the Central Population Register (CPR) – which is a national register of all Danish citizens – from which respondent's name and address were identified. Thus, the sampled unit was 'named individuals'. No stratification, clustering etc. was employed.
Fieldwork institute:	SFI SURVEY Herluf Trolles Gade 11 1052 Copenhagen K Denmark Tel: (+ 45) 3348 0900 E-mail: survey@sfi.dk
Fieldwork methods:	Postal survey (self-completion). If non-response then telephone interviews where used. The survey was posted mid September 2009. The first reminder was posted the 7th of October and the second reminder was posted the 28th of October From the 13th of November 2009 telephone reminders were carried out. 346 of the interviews were conducted over the telephone.
N. of respondents:	1518

Details about issued sample:	1. Total number of starting or issued names/addresses (gross sample size) *	2700

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	2. Interviews (1.0)

Language(s):	Danish
Weight present:	No
Weighting procedure:	None
Known systematic properties of sample:	None known
Deviations from ISSP questionnaire:	The ISSP module was the main part of a larger survey. After question 14 of the ISSP-module an extra question battery was attached with 17 questions and a total of 98 items. The supplementary questions were fielded by Christian Albrekt Larsen, Aalborg University. The questions were about media consumption and immigrants.

Estonia
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title: Social Inequality 2009

Study title for Estonian study: Võrdsus ning ebavõrdsus Eestis 2010
(Equality and inequality in Estonia 2010)

Fieldwork dates: 2010-06-04 – 2010-07-25

Principal investigators: Tallinn University
     Jelena Helemäe
     Kadri Täht
     Marii Pashkov

Sample type: Stratified three-stage probability sampling (area units, households, persons.)

Stage 1: Selection of 100 sample points proportional to size of population. The territorial model of the sample is set up on the basis of the population statistic database of the Estonian Statistical Office as of 1st of January 2009.

Stage 2: In the second stage the specific households in each sample point are identified by selecting randomly the starting address. The interviewer starts the route from the address that is identified by the fieldwork manager and visits every second apartment/house on the street/village. The objective is to conduct 10 interviews in every sample point. In order to do so, interviewer will continue the route until 10 interviews are conducted but at the same time following the rules of re-visits. In case the target person/nobody is not at home, then the interviewer will make a re-visit to the same address. There will be maximally 4 re-visits to one address (there has to be at least one re-visit in a work-day and at least one re-visit in a weekend).

Stage 3: In the third stage the specific persons are identified by random selection using Last-Birthday-Method. Interviewer will list all the members of the household (including the members who are not at home at the moment) and writes down the birthdays of the household members. After doing so the selection of the respondent will be made by using Last-Birthday-Method. In case the visiting time is not suitable to the selected respondent, then the interviewer will agree on some other time for the interview and make a re-visit. Interviewer has to make at least 4 re-visits to the households where the respondent (selected by using the Last-Birthday-Method) was not at home at the first visiting time.

Fieldwork will be conducted from 5 p.m to 9 p.m (work-days) and the whole day in weekends. The interviews are conducted only with the person selected by Last-Birthday-Rule (it is not allowed to conduct the interview with the other members of the household).

Fieldwork institute: Turu-uuringute AS

Fieldwork methods: In-person household survey

N. of respondents: 1005

Details about issued sample:	1. Total number of starting or issued names/addresses (gross sample size) *	4063
	2. Interviews (1.0)	1005
Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	1082
	B. Non-Contact (2.20)	1784
	C. Other	
	i. Language Problems (2.33)	5
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	0
	3. Unknown Eligibility, Non-Interview (3.0)	0
	4. Not Eligible	
	A. Not a Residence (4.50)	40
	B. Vacant Residence (4.60)	107
	C. No Eligible Respondent (4.70)	40
	D. Other (4.10,4.90)	0

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Known systematic properties of sample:	As we can see from data file, current sampling method is not the most efficient solutions for Estonian case. The fieldwork company usually applies 'young men rule' to get right result in every region and age group.
In last couple of years it is harder and harder to get F2F interviews and especially in big towns and also in younger age groups. That's why we the young man rule and quota for 15 – 29 and 55 – 74 age

groups are usually applied.

Deviations from ISSP questionnaire: Country-specific questions were added to the final questionnaire.

Spain
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form

Study title: Social Inequality IV –ISSP2009– Spain

Fieldwork dates: Start date: 2009-11-10
End date: 2009-11-30

Principal investigators: Juan DIEZ-NICOLAS, Institute: ASEP

Sample type: Four stages: 1) The sample is distributed proportionally to the population 18 years and over in each of the 17 Spanish Regions (the 2 cities in North Africa, Ceuta and Melilla, are excluded.)
2) The number of interviews to be collected in each region is distributed proportionally to the population in municipal population size strata within each region. (Five strata categories are used). Municipalities are then selected randomly from the list.
3) Once a municipality has been selected, the number of interviews is distributed among as many census sections as necessary in order to have around 8 or less interviews in each section. Once the number of sections is established, census sections are selected randomly from the list available for each section. In most municipalities only one census section is chosen. The total number of municipalities was 122, and the total number of census sections was 145.
4) Once a census section is selected, random routes are used to select the household. In each census section four route addresses were issued for each intended interview. There were 3 attempts to interview in the first address, and if non successful the second address was selected, and after 3 attempts to complete interview non-successfully the third address would be selected.

B. Vacant Residence (4.60)	……………………..
C. No Eligible Respondent (4.70)	……………………..
D. Other (4.10,4.90)	

Language(s):	Finnish (95,2 % of total sample)
	Swedish (4,8 % of total sample)
Weight present:	Yes
Weighting procedure:	The design of the survey was systematic sampling. In order to improve the efficiency of estimation and to reduce bias due to non-response a calibration method was used for the creation of the weights.

The following marginal distributions of the population were used:
1) gender (male, female),
2) age classes (15–24, 25–34,…, 65–74),
3) NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region,
4) type of community (urban - semi-urban - rural).

There are two weights available for calculations:
1) a weight that expands the results to the population level (the sum of the weights is the size of the population aged 15 to 74) and 2) a weight that doesn't have the expansion property (the mean of the

	weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data). Both of the weights are based on the same calibration process, only the scale differs.
Known systematic properties of sample:	Sampling frame is updated and covers total population with the appropriate language restriction. A cross-sectional sample does not contain attrition by definition. After having used our standard sampling procedures for over 20 years we have not encountered any bias due to using systematic sampling. Design effect of the sampling procedure <= 1 by definition.
Deviations from ISSP questionnaire:	The questionnaire included ISSP module with necessary background variables. Some additional (national) questions were included. List of deviations and coding specifications compared to ISSP source questionnaire: 1) V69--V72 were not asked in Finland 2) AGE (at the end of year 2009) Age is computed from a variable for year of birth in the Finnish questionnaire. 3) HHCYCLE The Finnish questionnaire asked separately how many persons there are in the household, how many of them are 7-17 years old and how many children are less than 7 years of age. Hhcycle includes combined information from these variables. 4) FI_REG Added from register data on regions. The Finnish questionnaire did not include a question for this. 5) FI_SIZE Added from register data on population of the municipality. The Finnish questionnaire did not include a question for this. 6) FI_ETHN Added from register data on mother tongue. The Finnish questionnaire did not include a question for this. 7) ETHNIC Added from register data on mother tongue. The Finnish questionnaire did not include a question for this. 8) WEIGHT and WEIGHT _2 - [weight] is a weight that expands the results to the population level (the sum of the weights is the size of the 15-74 population) and - [weight_2] is a weight that doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data).

C. No Eligible Respondent (4.70)	……27………….
D. Other (4.10,4.90)	……10………..

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):	English
Weight present:	yes
Weighting procedure:	Addresses were selected with equal probability (except in Scotland where allowance was made for MOI – see below) but only one person interviewed at each address. Therefore weights need to be applied to correct for different number of adults at each address. The weights are calculated by the following formula: Weight = (number of households at the address * number of adults in selected household) / MOI

Where MOI is the Multiple Output Indicator (MOI>1 indicates more than one household at the address).

Non-response weighting was then applied to correct for the unequal probability of response in different sub-groups in the population.

The final stage of the weighting was to adjust the final non-response weight so that the weighted respondent sample matched the population in terms of age, sex and region.

Very large weights were capped and the weights were scaled to make the weighted sample size equal to the unweighted sample size.

Known systematic properties of sample:	Sample excludes Scotland north of the Great Glen
Deviations from ISSP questionnaire:	None

Study title: Social Inequality IV ISSP2009

Fieldwork dates: 2009.06.01. – 2009.09.15.

Principal investigators: Institute for Social Research in Zagreb, Croatia

Sample type: Sampling frame: list of settlements derived from Census 2001.

Stratified random multi-staged sample: level of settlements, level of household, level of individual.

Two-way stratification: by 6 regions (defined as the traditional groups of counties) and 4 settlement sizes (defined by the number of residents). The size of each stratum is based on the proportion of the number of 18 + residents within the stratum in the total 18 + population.

Multistage sampling procedure:

1. Selection of primary sampling units (settlements) was conducted by the "probability proportionate to size" method. Each settlement had a probability of being in the sample proportionate to its population size. The selection of settlements was based on a random sampling procedure. All settlements in a stratum were alphabetically ordered and their respective populations were cumulated. Assignment of random numbers from the cumulative population of all settlements was conducted. Those settlements under which randomly assigned numbers fell into were chosen.

Within each primary sampling unit, the "random starting points method" was used to select starting points. There were 120 starting points in total. On average allocation of 10 respondents was assigned to each starting point.

2. Selection of households within the starting points was conducted by the "random walk method". Interviewers were instructed to follow a specified route from the starting point, conducting an interview at every 6-th dwelling/ housing unit (systematic sampling). Non-contacts were re-visited 5 times before being declared as non-response.

3. Selection of the respondent within a household was conducted by random selection by last birthday key.

Fieldwork institute: Institute for Social Research in Zagreb, Croatia

Fieldwork methods: Face to face interview

N. of respondents: 1201

ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form

Study title: Social Inequality IV

Fieldwork dates: 05.11.2009. – 21.11.2009.

Principal investigators:

Sample type: We applied probability sample that had been selected in multiple stages with proportional stratification. In the first stage, localities were chosen. In the second stage households were chosen while in the third step the respondents from the sampled households were selected.

In the first stage, locality strata have been created and the localities were chosen from these strata with the help of random sampling (PPS). All the county centres (19) are involved into the sample. For each county 1 additional town and 2-3 villages were selected. (In Pest county 2-3 towns were selected because the proportion of inhabitants of towns is extremely high there.) In addition, the capital, Budapest is always included into the selected localities because 20% of Hungarian population lives there. About 80 localities are selected.

Then, the number of respondents in the previously chosen localities has been defined in accordance with the proportion of the population of the given strata – counties, and different types of localities (county centres, towns and villages) within the counties. Thus, it is assured that each adult with an address in Hungary had equal probability to become a sample member.

Second stage: Selection of households, random walking

The random walking method is a quite widely used sampling method. The underlying idea of this method is that fieldworkers do not receive names and addresses, but a starting point and a route in all sample localities and a standardised procedure to select the individuals to be asked in the selected household.

Choosing the localities and the streets
When using the random walking method, the sample of localities is created as a first step, with the same method as it was detailed in the previous chapter.

After creating the locality sample, the streets and numbers were decided with the help of a random technique using a database containing all the street names in the selected localities. The selected street numbers form starting points for the interviewers.

All visited addresses were recorded on a list. This list contains the identification number of the completed questionnaires, the adapted Leslie Kish key of the sample member, his/her name, his/her address, and codes representing the success or the reason of the fall-out.

On the side of the chosen house, the interviewer had to select every fourth house/house gate as a sample house. At the end of the street, the interviewer had to proceed on the other side of the street. If one of the houses falls out, for some reason (e.g. it is inhabitable, one-flat house and the household member refuses to participate in the research), it has to be documented on the list (code of fall-out) and carry on the interviews in the next fourth house.

Choosing the flat

If there is more than one flat in the house,
— and the house has only a ground floor, than the second flat should be picked.
— and the house has one floor, then the second flat on the first floor should be chosen.

﹣   and the house has an odd number of floors, than the second flat of the middle floor should be chosen (e.g. the house has five floors than the second flat of the third floor should be chosen).

﹣   and the house has an even number of floors, than the floor number should be halved and second flat on that floor should be included into the sample (e.g. the house has four floors than the second flat on the second floor should be chosen).

The second flat is the one that is the second from the gate or the house entrance. All chosen addresses have to be administered on the list.

Choosing the person answering the questionnaire

The interviewer has to contact the family living in the chosen flat/house. Contact is considered successful if the interviewer could talk to one of the adults living in that flat. The person to be interviewed is chosen with the help of the adapted Kish key.

Fieldwork institute:	TÁRKI Social Research Institute
Fieldwork methods:	mode of interview: face to face
Sample size:	number of respondents in the final ISSP file:1010
Language:	Hungarian
Weighted:	yes or no, whether a weighting factor exists in the data-set: YES
Weighting procedure:	Exact description of the weighting procedure / algorithm

In order to correct the sampling error we computed a weighting variable taking into account the type of residence (Budapest, other city, village), sex (male, female), age (18-39, 40-59, 60+) and highest educational level (primary, secondary, tertiary). The weight of each cases was computed as WEIGHT = $(1/n')* [n*(N'/N)]$, where N = respondent above the age of 18 in the sample of 2001 census, N' = 1010, n = frequency of the population category in the census subsample the case belongs to, n' = parallel frequency in the 2009 Social Inequality IV module of TARKI.

Known systematic properties of the sample:	Description of biases or other deviations of the sample Table. 1. Crosstabulation of year of birth, type of residence, highest educational level and sex in the sample of 1010 in compare with the sample of Population Census Data in Hungary of 2001.

Results expected from the National Census 2001- Microcenzus 2005.

Iceland
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title:	Alþjóðlega viðhorfakönnunin á Íslandi 2009 (International Social Survey Programme).
Fieldwork dates:	The field-work started in November 2009 and ended in May 2010.
Principal investigators:	Jón Gunnar Bernburg, University of Iceland and Sigrún Ólafsdóttir, Boston University.
Sample type:	As a sampling procedure we used a random sample in the largest metropolitan areas (+ 3000), e.g. Reykjavík and Akureyri. Metropolitan areas stand for approximately 80% of the total population (1331 people in the sample for + 3000). Due to population distribution (rural areas / few people) cluster sampling was used in the smaller areas. Ten clusters were randomly selected by the size of the area (2000-2999; 1000-1999; 500-999; 299-499; less than 200), then individuals were randomly sampled within these ten clusters. The full sample consisted of a population of citizens aged 18 and over.
Fieldwork institute:	The Social Science Research Institute, University of Iceland.
Fieldwork methods:	Respondents were sent an introduction letter describing the survey. Respondents were called after a certain number of visits, to set up an interview. We had trained questioners who took structured face to face interviews with respondents. The interviews took place at respondent's homes.
N. of respondents:	Number of respondents in the final ISSP file were 947.

Details about issued sample: Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	……1699………

Study Description

ISSP Study Description: Japan

Study title: ISSP Social Inequality

Fieldwork dates: November 21 to November 29, 2009

Principal investigators: Miwako HARA, Kumiko NISHI and Hiroshi ARAMAKI (NHK Broadcasting Culture Research Institute)

Sample type: Two-stage stratified random sample of Japanese 16 or older.
First, urban and rural areas are divided into a number of groups (strata) based on similarities in local features and industrial structures. From each of those groups, streets and village-sections are again grouped together to form sampling units. From among such sampling units, 150 survey spots are selected at random. Then, from *the Basic Resident Registers* for these spots, 12 sample individuals aged 16 or over are selected according to a fixed random number.

Fieldwork institute: Central Research Services, Inc.

Fieldwork methods: Self-completion

Sample size: Issued 1.800, Achieved 1.296

Response rates:

Classification of Occupations   (country specific)

1. Agricultural, Forestry or Fishery workers
    Those who are engaged mainly in agriculture, forestry or fishery and family workers

2. The Self-Employed
    Those who operate shops, restaurants, plants, etc. each with 9 employees or less,
    as well as their family workers

3. Sales or Service Workers
    Employees or sales persons at shops, restaurants, department shores, etc.
    Employees at barber shops, beauty parlors, places of amusement, etc.
    Waiters and waitresses, housekeepers, transport conductors, station clerks, travel
    attendants
    Sales persons, canvassers, bill collectors

4. Skilled Workers, Manual/Unskilled Workers
    (Skilled Workers)

Locomotive-engine and motor-vehicle drivers
Those engaged in such work as manufacturing, repairs, assembly, processing, printing, spinning, sewing, tailoring, packing and bailing
Carpenters, joiners, plasterers, cabinetmakers
(Manual/Unskilled Workers)
Laborers in mining, construction, manufacturing and transport
Street vendors, deliverymen, garbage collectors

5. Clerical and Technical workers
Clerical and technical employees of business firm, public organizations and governmental agencies
Section and division chiefs of business firms and organizations with 49 employees or less
Those engaged in transportation, such as pilots and navigators
Education-related personnel such as college lecturers, teachers and nursery governesses
Medical-related persons such as pharmacists and nurses

6. Business operators or Managers
Directors and managers with the post of section chief or above of government offices
Directors and managers of business firms and organizations with 50 employees or more
Those who operate business firms and organizations with 10 to 49 employees
Directors of a kindergarten, headmasters, chief teachers, college presidents
Captains and crew chief of ocean-going vessels and aircraft and of craft serving major domestic routes

7. Specialists, Free-lancers, etc.
Medical doctors, lawyers, judges, certified public accountants, college (assistant) professors
Artists (painters, performers, etc.) and masters of various arts
Those related to professional sports, religious activities, politics
Self-Defense force personnel, policemen

8. Housewives
Women engaged mainly in housework
×Women who live alone are put in category 10 (Jobless)

9. Students
High school students Higher professional school students, junior college students, university students, graduate school students, special school students and miscellaneous school students
×Those who attend night high school or colleges, while working in the daytime, are put in categories 1 to 7

10. Jobless
Those who are not now employed and those who live on pension, etc.

97. Refused

99. No Answer

*Job-holders   Total of those listed in the items numbered 1 to 7
*Employed persons   Total of those mentioned in the items numbered 3, 4, 5 and 6

Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title: **"Monitoring of Social Problems"***(parts of the survey: ISSP module "Social Inequality 2009", "Social Policy", ISSP module "Environment 2010", "e.social networks".*

Fieldwork dates: *Start: 2010-11-30*
End: 2011-02-03

Principal investigators: *Prof. Algis Krupavičius, Policy and Public Administration Institute, Kaunas University of technology*

Sample type: description of the sampling procedure
Clustered two stage random sample. Sampling frame: electoral district and address register. Persons from 18 years and older who are residents within private households in Lithuania. Sampled units for the first stage: 108 primary sampling units (PSU) were selected from 2035 electoral constituencies. Selection was based on probability proportional to size method. Sampled units for the second stage: within selected PSU's household addresses were selected (SRS procedure). Selection method to identify a respondent: last birthday.

Fieldwork institute: institute which conducted the survey
"RAIT", Ltd., Market Analysis and Research Group (Lithuania)

Fieldwork methods: mode of interview
Face to face interview/paper and pencil interview (PAPI), with visuals

N. of respondents: number of respondents in the final ISSP file:
1023

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	……3805…….
2. Interviews (1.0)	……1023………
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	……1226………
B. Non-Contact (2.20)	…….435………
C. Other	…………………
i. Language Problems (2.33)	……...54……….
ii. Miscellaneous Other (2.31, 2.32, 2.35)	……...76……….
3. Unknown Eligibility, Non-Interview (3.0)	………0………….
4. Not Eligible	
A. Not a Residence (4.50)	………991………
B. Vacant Residence (4.60)	………………..
C. No Eligible Respondent (4.70)	………………..
D. Other (4.10,4.90)	………………..

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):   language or languages of the field instrument
Lithuanian

Weight present: yes or no, whether a weighting factor exists in the data-set
Yes

Weighting procedure: exact description of the weighting procedure / algorithm
Weight based on age and gender

Known systematic   description of biases or other deviations of the sample

properties of sample:	Gender specific. Proportion of women responses is higher.
Deviations from ISSP questionnaire:	esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes
	The ISSP2009 module was a part of a larger survey. The structure of the questionnaire is following:
	Q1-Q25: ISSP module "Social Inequality 2009"(Question about top-bottom self-placement (Q10a, variable "TOPBOT") was positioned in this part between Q9 and Q10b, not in background questions part).
	Q26-Q36: "Social Policy".
	Q37a-Q59: ISSP module "Environment 2010". In questions Q56a,b,c,d,e,f (corresponds Qa,b,c,d,e,f of original „Environment2010" English questionnaire) we included category „Can't choose" treated as missing.
	SD1-SD36: ISSP background questions (except SD33 - Lithuanian specific question about the amount of income needed to maintain the wholesome living standard).
	SD37-SD41: questions about self-evaluation of respondent's social position.
	ST1-ST10: "e.social networks".

Norway
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title:	Attitudes to Social Inequality
Fieldwork dates:	16.10.2009 – 07.05.2010
Principal investigators:	Kirstine Kolsrud, Anne Katrine Mortensen and Knut Kalgraff Skjåk, NSD.
Sample type:	The sample was a random sample of 3 500 individuals from the Central Register of Persons, aged 19-80 years. Of these 2 750 were randomly selected for the main survey (combined mail and web survey) starting in October 2009. 750 were randomly selected for an eventual additional survey (mail) in case of high non-response. The additional survey was started in February 2010.
Fieldwork institute:	Statistics Norway
Fieldwork methods:	The main survey was conducted as a combined mail survey and web survey with one reminder and two follow-ups with questionnaires. The URL and individual username and pin code for the web questionnaire were provided in the first letter. Paper questionnaires were attached in the two last follow-ups. The additional survey using a reserve sample was a mail survey with two follow-ups. Questionnaire was attached in all three contacts.
N. of respondents:	555 web and 459 pencil and paper in main survey, 232 pencil and paper in additional survey, all in all 1246.

Details about issued sample: Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	3500
	2. Returned questionnaire (1.0)	1246 ~~1456~~*

	3. Eligible, Non-Interview
	   A. Refusal (2.11)
	   B. Implicit refusal (blank questionnaire) (2.113)
	   C. Break-off questionnaire too incomplete (2.12)

Dear Markus

ISSP: 2009 Survey
Social Inequality III

Please find enclosed the following information relating to the above survey:

1. SAMPLING INFORMATION
   - Sampling procedure
   - Survey administration procedure
   - Response rate
   - National population characteristics

2. MAIL PACKAGE
   - Questionnaire
   - Covering letters

Please contact me if you have any queries about the data.

Regards,

Phil Gendall
Professor of Marketing

ISSP Study Description Form

Study-Title:	Social Inequality III: New Zealand
Fieldwork Dates:	29 July 2009 to 30 November 2009
Principle Investigator:	Professor Philip Gendall, School of Communication, Journalism & Marketing, Massey University, Palmerston North, New Zealand
Sample Type:	Stratified random sample from electoral rolls (sample stratified by age)
Fieldwork Methods:	Mail survey in four waves
Context of ISSP questionnaire:	Dedicated survey, with ISSP questions preceding non-ISSP questions and demographics
Sample Size:	2250
Response Rates:	2250 — A – Total issued (total sample) 136 — B – Ineligible (address vacant, wrong ages,) 2114 — C – (=A-B) Total eligible (in-scope sample) 935 — D – Total ISSP questionnaires received 1179 — E – (=C-D; F+G+H) Total non-response 88 — F – Refusals (refusing to take part) - — G – Non-contact (never contacted) 1091 — H – Other non-response
Language:	English
Weighted?	No
Weighting Procedure:	Original data not weighted but weighting variable provided. The weighting variable weights the sample so its age-sex distribution matches that of the New Zealand population according to the 2006 census.
Known Systematic Properties:	
Deviations from ISSP Questions:	Occupation questions 15b, 16c, and 18b not included. Optional questions 24a, b and c and 25a, b and c not included.
Literature:	

SAMPLING INFORMATION

Sampling Procedure

The sample was selected from the 2009 New Zealand electoral roll, which contains the names of all registered voters over the age of 18 years. The population was first stratified by age: under 35, 35 to 54, 55 and over; then equal samples of 750 were randomly selected within each age group. The achieved sample is generally representative of the New Zealand population over 18 years of age, but people under 30 are underrepresented in the sample, while those over 60 are overrepresented, and the proportion of women is higher than in the population whereas the proportion of men is lower. The data have **not** been weighted to correct these biases. Comparisons of unweighted survey results with results obtained from the sample weighted so that its age-sex distribution matched that of the New Zealand population over 18, showed only minor differences between many estimates, but weighting by age and sex is likely to produce more accurate estimates for behavioural variables.

Survey Administration Procedure

The questionnaire together with a covering letter was sent to the 2250 selected participants on 29 July 2009. A reminder letter was mailed to participants whose questionnaires had not been returned by 20 August. A second reminder and another questionnaire were sent to those who had not returned their questionnaires by 28 September. A final reminder was sent to all remaining non-respondents on 23 October. The survey was closed off on 30 November, 18 weeks after the initial mailing.

Poland
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title:	Polish General Social Survey/ISSP, 2009
Fieldwork dates:	2010-06-02 2010-07-09
Principal investigators:	Bogdan Cichomski, Institute for Social Studies, Warsaw University (ISS UW)
Sample type:	Multi-stage area probability sample. The sample was drawn from The Common Electronic Population Evidence System - PESEL (a governmental agency). Sampling procedure consists of the three stages:

1. In each of the 16 voivodeships in Poland places of living were divided up into three categories
1) capital of the region
2) other cities
3) villages

In voivodeships with the higher number of people places were additionally divided up into higher number (up to 5) of smaller categories.

Additionally, in Mazovieckie and Slaskie voivodeships *villages* category was divided up into two categories. In Mazovieckie the division was based on the Vistula river line and in Slaskie on the traditional division into Slask and Zaglebie region.

As an effect there was 74 strata taking into consideration the administrative division of the country and type and size of the place of living.
Assumed sample size was divided up into the strata taking into consideration different completion rates in classes of places of living in voivodeships. It means that from classes of places of living where the completion rates are known to be lower then in other there was an over-representative sub-sample sampled.

2. In the second stage in CBOS (Public Opinion Research Center) cities and villages communes were sampled. After that in PESEL data-base some small areas of the cities and villages communes were sampled. Persons to be interviewed were chosen also from the PESEL data-base from the previously selected areas. In cities, small areas covered some streets and it's neighborhood and in villages the areas of one village and/or some of it's streets.

3. In each stratum at least two small areas were sampled. From each small area eight adults living in different locations and differing in sex and age were sampled.

Areas allocation in strata was not proportional and involved two factors:
1. number of adult people in strata and it's proportion in whole sample
2. response rate in class of the place of living, that is a strata inside voivodeships
The basis for calculating expected response rates was the average

response rates in *Current problems and events*, a monthly survey conducted by Public Opinion Research Center (CBOS).

Fieldwork institute:	Public Opinion Research Center (CBOS), Warsaw
Fieldwork methods:	Face-to-face supplement completed after the PGSS interview
N. of respondents:	1263

Details about issued sample: Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. Language(s):	Polish
Weight present:	yes
Weighting procedure:	Weighting factor was calculated using IPF (*Iterative Proportional Fitting*) algorithm. It includes four variables: 1. sex (male, female) 2. age categories (18-24, 25-34, 35-49, 50-59, 60 and more years) according to sex 3. type and size of the place of living (village, cities<20000, cities 20000-99999, cities 100000 and more inhabitants) 4. voivodship (16 voivodships corresponding to administrative division of Poland). 4 iteration were needed to comply with the population-based distributions. Weighting procedure assumes that after weighting the sample size is equal to the number of completed interviews.
Known systematic properties of sample:	None after weighting
Deviations from ISSP questionnaire:	Some questions (6, 10a, 10b, 11, 15a, 15b, 16a, 16b, 16c, 17, 18a, 18b, 19a, 19b, 20, 21a, 21b) asked in main PGSS questionnaire
Publications:	None

Portugal
ISSP 2009 – Social Inequality IV
Study Description

ISSP 2009
Study Description: Portugal

Study title: Inquérito Social Internacional

Fieldwork dates: June to November 2009

Principal researchers: Jorge Vala, Alice Ramos, Instituto de Ciências Sociais da Universidade de Lisboa.

Sample type: Stratified random probability. The sample is designed to be representative of adults aged 18 or over living in private accommodation in Portugal. The sample method involved a multi-stage design: stratification by region and habitat; Selection of sampling units (100); selection or streets: selection of addresses by random root; selection of individuals by the last birthday method.

Stratification factors used:

    - NUTES (North, Center, Lisbon and Tagus Valley, Alentejo and Algarve)

    - HABITAT (less than 2.000 hab.; 2 - 10 thousand hab; 10 - 30 thousand hab; 30 - 100 thousand hab; more than 100 thousand hab)

In order to get a representative sample, near 40% of the interviews were made in habitats with less than 2000hab. Some problems came up, such us, a level of non-responses and refusals higher than expected.

Fieldwork methods: face-to-face CAPI interview with visuals

Context of ISSP questionnaire: Atitudes Sociais dos Portugueses (*Portuguese Social Attitudes)*

Sample size: Achieved on ISSP:

Response rates :

2770	A – Total issued
647	B – Not eligible
2123	C – Total eligible
1000	D – Total ISSP questionnaires received
1123	E –Non-responses
823	F – Refusals
297	G – Non-contact
3	H – Other non-response

Language: Portuguese

Weighted: Yes

Weighting Procedure: Data was weighted in order to be proportional to the distribution of the universe according to the following variables: NUTS'II, habitat, sex and age groups

National Population Characteristics: Portugal

Sex and age

Note: The data concerns only the population resident in the Mainland (excluding Azores and Madeira)

Unit: thousands of individuals

	Total		M	F

Note: The distribution is very different from the one of the universe, but 9 years is a long time span and we don't have access to actualized official statistics.

Russia
ISSP 2009 – Social Inequality IV
Study Description

Study title:	'official' title of the study/survey in your country Module **2009 "Inequality"** has been added to **the regular omnibus "Vestnik"**
Fieldwork dates:	start and end dates of field-work, please use format yyyy-mm-dd start date: 2009-12-02; end date: 2009-12-24
Principal investigators:	name and institution **L.Khakhulina, Levada-Center**
Sample type:	***Description of the sampling procedure*** The omnibus survey is based on the nationwide, multi-stage, stratified and probability sample (N=1600) that represents the adult population in age 18+ .

Stratification. The nationwide sample (N=1600) was divided among:
 a) 7 large geographical macro regions (Federal Okrugs) proportionate to the size of the local population aged 18+ of each macro region
b) 6 types of urban settlements and rural districts * in each of 7 macro regions proportionate to the size of the local population aged 18+ of each type.
  1) cities > 1,000 000 residents
  2) cities > 500 000 -   1,000 000
  3) cities > 100 000 – 500 000
  4) cities and small urban settlements < 100 000
  5) rural districts
 If to take into account that in the North-West region there are no cities of 500-1,000 thousands of residents, in the Far East region there are no cities of more then 1,000 thousands of residents the total number of strata is 33.

Selection of primary sampling units (PSUs). On the first stage urban settlements and rural administrative districts as primary sampling units were selected.
All cities over 500, 000 inhabitants were included in the sample as self-representative units.
Urban settlements and rural districts were considered as primary sample units (PSUs). In each stratum (except strata of cities over 500,000 and cities over 1,000 000) the number of PSUs was calculated with the limitation of 10-12 interviews per PSU and the PSUs as well were selected with the probability proportionally to the size (PPS). The total numbers of interviews accounted for a stratum was distributed approximately equally among selected PSUs. Totally **135** PSUs were selected including 96 urban and 39 rural sampling points.
Selection of secondary sampling units (SSUs). On the second stage the secondary sampling units (SSU) were selected from the lists of streets in urban settlements and localities in rural districts.
.In the big cities (more then 500 000 residents) the number of surveyed SSUs was defined by condition of 8-12 interviews per SSU.

10 SSUs were selected in Moscow, 5 SSUs - in S-Petersburg.
In the middle and small cities and rural districts 1-2 SSUs were randomly selected from the list of all potential sampling points (streets and localities).
Totally **150** secondary sample points were selected.

 On the third stage the households were selected by a random route method. If nobody at home or a member of a household randomly selected as a respondent refused to participate in the survey, or if a household or a respondent were not achieved for 3 visits, the interviewer was required to visit the next door address.

Fieldwork institute: institute which conducted the survey
Analytic Levada Center (Levada-Center)

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):   language or languages of the field instrument
Russian

Weight present: yes or no, whether a weighting factor exists in the data-set
Yes, exists

Weighting procedure: exact description of the weighting procedure / algorithm

The total expected number N of respondents for a certain region being treated equal
$N = N0 * P$,

where N0 denotes the size of the total sample,
P - share of the region population in the entire population.

As a result of correction, every respondent X[k] has the definite weight W[k],
within the limits $0 < W[k] < \sim 10$,
so that the following conditions were valid:
1)the value of sum(W[k]) for the region concerned was equal to N
2)for every controlled group G[i] the value Q[i] being equal to
Q[i] = sum(W[k] | X[k].belong to G[i]) / N,
was closed to a proportion P[i] of group G[i] in the region population
i.e.   Q[i] ~ P[i], i=1,2,...,7.
The value of J being equal to
 J = sum((Q[i]-P[i])**2) + (sum(W[k])/N - 1)**2 ,
was used as the criterion for minimization on the weights` sets variety

Quality of corrections (shares, 0,01%)

Study Description

ISSP Study Description Form
(ISSP 2008 + ISSP 2009; Slovenia)

Study title:	*Slovene Public Opinion Survey 2009/1: International Survey Religion, ISSP 2008 + Social Inequality, ISSP 2009*
Fieldwork dates:	*24th March 2009 – 4th June 2009*
Principal investigators:	*Mitja Hafner-Fink, Brina Malnar, Niko Toš; Public Opinion and Mass Communication Research Centre (CJMMK), Ljubljana.*
Sample type:	*Universe: The adult residents of SR Slovenia, older then 18 years, living on permanent address. Excluded: Institutionalised people. Central Register of Population (a list of names and addresses constantly updated by public administration) is employed as a sampling frame. Sampling procedure: The sample is two-stage stratified random sample from Central Register of Population, where every population unit has equal probability of selection. First stage PSU selection is made by probability proportional to size of CEA (Clusters of Enumeration Areas). CEA are stratified according to 12 regions*6 type of settlement. At second stage systematic random selection inside CEA brings fixed numbers of persons with name and address. Spilit-halves samples were used for parallel SJM surveys.*
Fieldwork institute:	*Public Opinion and Mass Communication Research Centre (CJMMK), University of Ljubljana*
Fieldwork methods:	*Personal interviews with trained interviewers*
N. of respondents:	*1065*

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/pdfs/standarddefs_3.1.pdf. The numbers in the parentheses are those used in Table 2 of Standard Definitions.

Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title: Social Inequality 2009

Fieldwork dates: 23.10.2009 – 05.01.2010

Principal investigators:
Ersin Kalaycıoğlu
Ali Çarkoğlu
Istanbul Policy Center-Sabancı University

Sample type: Sampling frame: Population register of household addresses obtained from the Statistical Institute of Turkey (SIT).
First stage: Sample observations are distributed across 26 NUT-2 regions according to population distribution. Then urban and rural population shares are applied to each region and urban and rural observations are obtained. From each region SIT was contacted to provide address blocks for urban settlements.
Second stage: Each block contained 300 household addresses and 10 addresses were selected from each block on a simple random selection basis. For rural areas all rural settlements in every NUT region all villages were used to randomly select villages according to population weights of the villages. In every village the pre allotted number of interviews was 10 and thus villages are treated as city blocks. The number of villages to be contacted is determined accordingly.
Third stage: Since no replacement was to be used we selected approximately twice the number of targeted interview household addresses (3030 in total). Every address is contacted at most 4 times to obtain a completed interview. Within the households all residents above the age of 18 are listed and a respondent from within this list is randomly selected. No quotas of any kind was applied.

Fieldwork institute: Infakto Research Workshop

Fieldwork methods: Face-to-face

N. of respondents: 1569

Details about issued sample:

Language(s):   language or languages of the field instrument
Mandarin Chinese, Fukien dialect, or Hakka dialect

Weight present: yes or no, whether a weighting factor exists in the data-set
Yes

Weighting procedure: exact description of the weighting procedure / algorithm
The data was weighted using an iterative proportional raking scheme. For each respondent, sample data were weighted by sex, age, urbanization and education-degree groups. Weights were then generated to match the population characteristics of Taiwan area

Known systematic properties of sample: description of biases or other deviations of the sample
A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household.

Deviations from ISSP questionnaire:	esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes
Publications:	list of publications using the present data set

Ukraine
ISSP 2009 – Social Inequality IV
Study Description

UKRAINE

ISSP Study Description Form

Study title: Opinions and views of Ukrainian people: June 2009 (ISSP-Social Inequality)

Fieldwork dates: 2009-06-12 – 2009-06-21

Principal investigators: V.Paniotto (KIIS), S.Makejev (IS NAS Ukraine)

Sample type: The sample is multistage, random at each step of selection.

The sample was based on random selection of sampling points (post-office districts) in 110 settlements (PSU) in all regions of Ukraine and in the Autonomous Republic of Crimea.

The target population for Ukraine is defined as the resident adult population age 18 and older. Persons living in institutions are not eligible (the military personnel living in casernes on the territory of units, the prisoners, who are locating in prisons and camps on the territory of Ukraine, and also the people, who are undergoing lingering treatment and living in hospitals). The sample of households from which sample persons are being selected is based on randomly sampled postal districts within proportionally sampled settlements (e.g., city, town, village). The 3-stage sample design is described below:

A stratified, multi-stage area probability sample was employed. Ukraine is divided into 24 oblasts and the Crimea. Each oblast is divided into rajons (or counties), and one city in each oblast is designated as the oblast center. Each oblast contains cities, towns, villages of the city type (PGTs), and villages, reflecting the type of municipal administration granted to the settlement. In the first stage, 110 Primary Sampling Units (PSUs) were selected with PPS (probability proportional to size) from the cities, PGTs and rural rajons. The sample was drawn so that the urban and rural populations of each oblast were represented proportionally.

Once the PSUs were selected, a sample of postal districts were chosen randomly from the list of residential postal districts within each PSU, taking into account the number of residential districts, which is proportional to the number of apartments (in Ukraine, the list of residential postal districts has been determined to be more accurate than housing and voting lists).

In the third stage, a randomized-number rule is used to select the street, household and apartment that the interviewer is to visit first. Before selecting „potential respondents", the interviewer enumerates and lists adult (i.e., 18 or older) household members living in a consecutive run of apartments (i.e., from lower to higher apartment numbers) until he or she has a list of occupants sorted by (1) apartment, (2) gender, and (3) age. After generating a list of occupants, the interviewer seeks to recruit every third occupant for the study (i.e., one third of all potential respondents).

Fieldwork institute: Kiev International Institute of Sociology (KIIS)

Fieldwork methods:	Oral survey with standardized questionnaire. Face-to-face, paper and pencil, visuals / cards used.	
N. of respondents:	2012	

Details about issued sample:	1. Total number of starting or issued names/addresses (gross sample size)*	3987
	2. Interviews (1.0)	2012
Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	346
	B. Non-Contact (2.20)	1024
	C. Other	90
	i. Language Problems (2.33)	0
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	30
	3. Unknown Eligibility, Non-Interview (3.0)	0
	4. Not Eligible	
	A. Not a Residence (4.50)	416
	B. Vacant Residence (4.60)	0
	C. No Eligible Respondent (4.70)	0
	D. Other (4.10,4.90)	58

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

1.0 - incl. Completed interview (N=2012) , and Partial interview (N=0).
2.10 - incl. Household-level refusal (N=219), Known respondent refusal (N=117), Break-off (N=10).
2.20 - incl. Unable to enter building/reach housing unit (N=83), No one at residence (N=806), Respondent away/unavailable (N=135).
2.35 – incl. Physical or psychical condition of a respondent does not allow to carry out an interview (N=30).

Language(s):	Ukrainian, Russian
Weight present:	Yes
Weighting procedure:	The results of the survey were compared to correspondent statistics of the last Ukrainian census conducted in 2001. The variables which were controlled are: region, settlement type, gender and age. The comparison of the survey data to statistics distributions by settlement type and by four regions reveals the accuracy of sample realization by interviewers; the regional and settlement type distributions were preset in the sample structure. The comparison of received data with statistics by demographic characteristics – gender, age – shows the maximum shifts in 10.3% by gender, and 7.1% in age group consisting of those respondents aged 50-59.

The distribution of population aged over 18 by four regions, settlement type, gender and age

	Statistics	Before weighting	Difference	After weighting	Difference
Region					
Western	21.9	22.0	-0.1	22.5	-0.6
Central	29.8	29.8	0.1	29.6	0.2
Southern	26.4	26.6	-0.1	26.3	0.2
Eastern	21.8	21.6	0.2	21.6	0.2

Settlement type					
Urban	67.8	67.3	0.6	67.1	0.7
Rural	32.2	32.7	-0.6	32.9	-0.7
Gender					
Male	45.0	34.6	10.3	45.0	0.0
Female	55.0	65.4	-10.3	55.0	0.0
Age					
18-29	22.2	18.8	3.4	22.2	0.0
30-39	17.4	15.8	1.6	17.4	0.0
40-49	19.2	16.5	2.7	19.2	0.0
50-59	13.9	21.0	-7.1	13.9	0.0
60-69	14.6	13.2	1.4	14.6	0.0
70 +	12.7	14.7	-2.0	12.7	0.0

*The source of statistical data: Ukrainian National Census, 2001.

To adjust the data shifts a variable of weight was constructed.

Sex	Age	Statistics	Data before weighting	Weight
Male	18-29	11.2	8.7	1.282867
	30-39	8.5	5.4	1.594156
	40-49	9.1	5.9	1.555941
	50-59	6.3	7.4	0.838990
	60-69	6.0	3.4	1.747991
	70 +	3.9	3.8	1.008326
Female	18-29	11.0	10.1	1.091366
	30-39	8.9	10.4	0.851191
	40-49	10.1	10.6	0.951178
	50-59	7.6	13.6	0.563117
	60-69	8.6	9.8	0.876098
	70 +	8.8	10.8	0.811980

Known systematic properties of sample:

Theoretical sample error is $\Delta = 1/\sqrt{n}$. Standard design-effect for the nationwide sample used in KIIS surveys is 1.5.

Therefore, the sample error for the survey (the sample size of 2012, and probability 0.95) does not exceed:
- 3.3% for percentages close to 50%;
- 2.8% for percentages close to 25%/75%;
- 2.0% for percentages close to 10%/90%;
- 0.7% for percentages close to 1%/99%.

Deviations from ISSP questionnaire:

Changed :

Q32. R: Religious denomination
Added country-specific options:
321 Orthodox (Ukrainian Orthodox Church - Moscow Patriarchate)
322 Orthodox (Ukrainian Orthodox Church - Kyiv Patriarchate)
323 Orthodox (Ukrainian Autocephalous Orthodox Church)

Q19a. WRKTYPE
Added category «Works for collective farm» under code 5.
Added category «Farmer» under code 6.
Added category «No answer» under code 9.
Code of category «Other» changed from «5» in original questionnaire to «7» in Ukrainian/Russian.
Code of category «I have never had a paid job» changed from «0» in original questionnaire to «8» in Ukrainian/Russian.

In data set all scales was recoded to standard.

Country-specific questions:

ua_ETHN Ethnic identity
D4. What do you consider your nationality?
1 Ukrainian
2 Russian
3 Both Ukrainian and Russian
4 Byelorussian
5 Moldavian
6 Crimean Tatar
7 Bulgarian
8 Hungarian
9 Romanian
10 Pole
11 Jew
12 Other
13 Don't know

ua_DEGR Country-specific degrees of education
D8.1. Now look at this card [HAND CARD]. **What is the highest level of education you've obtained so far?**
1 No formal education (never went to school);
2 Elementary or some secondary (1-6 years of secondary school);
3 Incomplete secondary (7-9 years of secondary school);
4 Vocational education without secondary (vocational technical school (PTU), schools of factory and plant apprenticeship (FZU) etc.);
5 Secondary education (10-11 years of secondary school);
6 Vocational technical training after 10-11 years of school;
7 Junior specialist grade (technical, medical, primary-school teachers' training college, musical school etc), incomplete higher education, specialized secondary education.
8 Basic higher education (bachelor's degree)
9 Higher education (specialist degree, master''s degree)
99 NO ANSWER

ua_INC Family income
D29. Taking into account the income of all members of your household last month (after taxes, including all types of income – salary, scholarship, pension, benefits, grants, allowance etc), what was the total income of your family?
(sum in UAH; at the time of survey 1 UAH ≈ 0.20 USD)
000000. No income
999997. Refused
999998. Don''t know
999999. No answer

ua_RINC R: Earnings – country specific
D30. And what was your personal income last month (after taxes, including all types of income – salary, scholarship, pension, benefits, grants, allowance etc)?
(sum in UAH; at the time of survey 1 UAH ≈ 0.20 USD)

000000. No income
999997. Refused
999998. Don't know
999999. No answer

ua_PRTY Respondent's party affiliation – country-specific
D36. There are more than 100 parties in Ukraine. Which party or block of parties do you tend to support?
1 Party of Regions (*Партія регіонів*)
2 Bloc Yuliya Tymoshenko / All-Ukrainian Union "Fatherland" (*Блок Юлії Тимошенко/Партія Батьківщина*)
3 Our Ukraine / People's Self-Defence / People's Movement of Ukraine (*Наша Україна/Народна самооборона/Народний Рух України*)
4 Communist party of Ukraine (*Комуністична партія України*)
5 Lytvyn's block / People's party (*Блок Литвина/Народна партія України*)
6 All-Ukrainian Union "Freedom" (*ПО «Свобода»*)
7 Socialist party of Ukraine (*Соціалістична партія України*)
8 Party of Greens of Ukraine (*Партія зелених України*)
9 Progressive socialist party of Ukraine (*Прогресивна соціалістична партія України*)
10 Social Democratic Party of Ukraine (*Соціал-демократична партія України*)
11 Other party
12 No party, no preference
13 DON'T KNOW
99 NO ANSWER

ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title:	General Social Survey 2010
Fieldwork dates:	18 March – 14 August, 2010
Principal investigators:	Tom W. Smith, Peter V. Marsden, Michael Hout
Sample type:	Multi-stage area probability sample
Fieldwork institute:	NORC
Fieldwork methods:	Face-to-face with CAPI
N. of respondents:	1,581

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	………2023
2. Interviews (1.0)	………1581

3. Eligible, Non-Interview
    A. Refusal/Break-off (2.10)
    B. Non-Contact (2.20)
    C. Other
    i. Language Problems (2.33)
    ii. Miscellaneous Other (2.31, 2.32, 2.35)
	
	………..233
	………..105
	
	….....………0
	...………..41

3. Unknown Eligibility, Non-Interview (3.0)	…………….0

4. Not Eligible
    A. Not a Residence (4.50)
    B. Vacant Residence (4.60)
    C. No Eligible Respondent (4.70)
    D. Other (4.10,4.90)
	
	…………..16
	…………….0
	…………..13
	…………..34

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s):	English and Spanish
Weight present:	Yes
Weighting procedure:	The weight variable takes into consideration 1) the sub-sampling of non respondents, and 2) the number of adults in the household. The GSS uses a sub-sampling design to focus resources on a smaller set of the difficult cases for further attempts, thereby reducing non-response bias.
Known systematic properties of sample:	Undersamples men and those under 25 and those over 65
Deviations from ISSP questionnaire:	No
Publications:	Not released to the public yet

	22	

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*It has been discovered (K. M. Slomczynski, P. Powalko and T. Krauze) that the Venezuelan dataset includes 30 duplicated records. The following ID numbers are involved:

19	963
79	965
104	966
129	967
156	968
233	971
259	972
311	974
337	975
363	976
389	977
415	978
441	979

The primary researcher for Venezuela decided to delete the following cases:
963, 965, 966, 967, 968, 971, 972, 974, 975, 976, 977, 978, 979, 980, 981, 983, 984, 985, 986, 988, 989, 990, 991, 992, 993, 994, 995, 997, 998, 999

Since dataset version ZA5400_v4-0-0 the sample size for Venezuela is 969.

Language(s):	Spanish
Weight present:	Yes
Weighting procedure:	To take account of selection probabilities

South Africa
ISSP 2009 – Social Inequality IV
Study Description

ISSP Study Description Form
Please use this form for reporting on Module 2006 and later!

Study title: South African Social Attitudes Survey (SASAS)

Fieldwork dates: start dates: 2009-11-01, end date 2009-12-10

Principal investigators: Jare Struwig –Human Sciences Research Council

Sample type: A sample of 3500 respondents was selected throughout South Africa in 500 census enumerator areas (EAs) as determined in the 2001 census. Each EA was classified in terms of the dominant lifestyle category by the Human Sciences Research Council (HSRC) in its analysis of the 1996 census data. In order to ensure adequate representation in the sample from each province and from each of the four dominant population groups, the sample was stratified by province and by population group. Disproportionately large samples were selected from areas know to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape. Within the EAs, the households were randomly selected and within the household, the respondent were selected using a Kish grid.

Fieldwork institute: Human Sciences Research Council

Fieldwork methods: Face to face

N. of respondents: 3305:

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org /uploads/standarddef s_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

for further clarification.

Language(s):	English, Afrikaans, Tsonga, Tswana, Xhosa, Zulu
Weight present:	Yes

Weighting procedure: Explicit stratification variables: Province, population group and geography type (viz. urban formal, urban informal, tribal and rural formal, including commercial farms).
The EA (census enumerator area) is used as PSU (primary sampling unit) and the number of households (HHs) in the EA as the MOS (measure of size). EA's are drawn within the explicit strata pps and a fixed number of households drawn per drawn EA. Within each drawn HH one person 16 years or older is drawn at random using Kish's grid.

Non-response adjustment = number of drawn HHs per EA / number of responding HHs (i.e. where a person 16+ is successfully interviewed) provided that at least 50% of households responded. Otherwise two similar (i.e. in the same explicit stratum) and neighbouring EAs are combined and a combined adjustment factor calculated.

Person and household weights are benchmarked using the SAS CALMAR macro and province, population group, gender and 5 age groups (i.e. 16-24, 25-34, 35-49, 50-50 and 60 and older) as benchmark variables for persons and province and population group of the respondent in the household for households as benchmark variables. The marginal totals for the benchmark variables are obtained from the applicable midyear estimates as published by Statistics South Africa. In other words, the estimated South African population for the applicable year is used as target population.

Rescaling not explicitly but only implicitly
I assume that this question relates to whether sample sizes are rescaled with the view to do cross-tabulating analyses using STATA. Sub-class analyses are done by using SAS surveymeans, using the "domain" facility.

Known systematic properties of sample: Disproportionately large samples were selected from areas know to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape

Deviations from ISSP questionnaire: No

Publications: None

Highest Qualification[1]
for the Census Usually Resident Population Count
Aged 15 Years and Over, 2006

	Highest Qualification	Census Usually Resident Population Count
00	No Qualification	708,432
01	Level 1 Certificate	394,593
02	Level 2 Certificate	306,327
03	Level 3 Certificate	247,674
04	Level 4 Certificate	286,599
05	Level 5 Diploma	110,496
06	Level 6 Diploma	157,866
07	Bachelor Degree and Level 7 Qualification	315,849
08	Post-graduate and Honours Degrees	55,458
09	Masters Degree	59,706
10	Doctorate Degree	16,770
11	Overseas Secondary School Qualification	172,590
97	Response Unidentifiable	136,878
99	Not Stated	191,136
Total		3,160,374

(1) In 2006, Highest Qualification data has been output in two different ways.
The categories in this table show Highest Qualification on the basis of the new
New Zealand qualifications register.
The data in the table shows highest level of qualification gained, regardless of whether
that qualification was gained at school or post-school.

This data has been randomly rounded to protect confidentiality. Individual figures may not
add up to totals, and values for the same data may vary in different tables.
